

# 7evenTimes

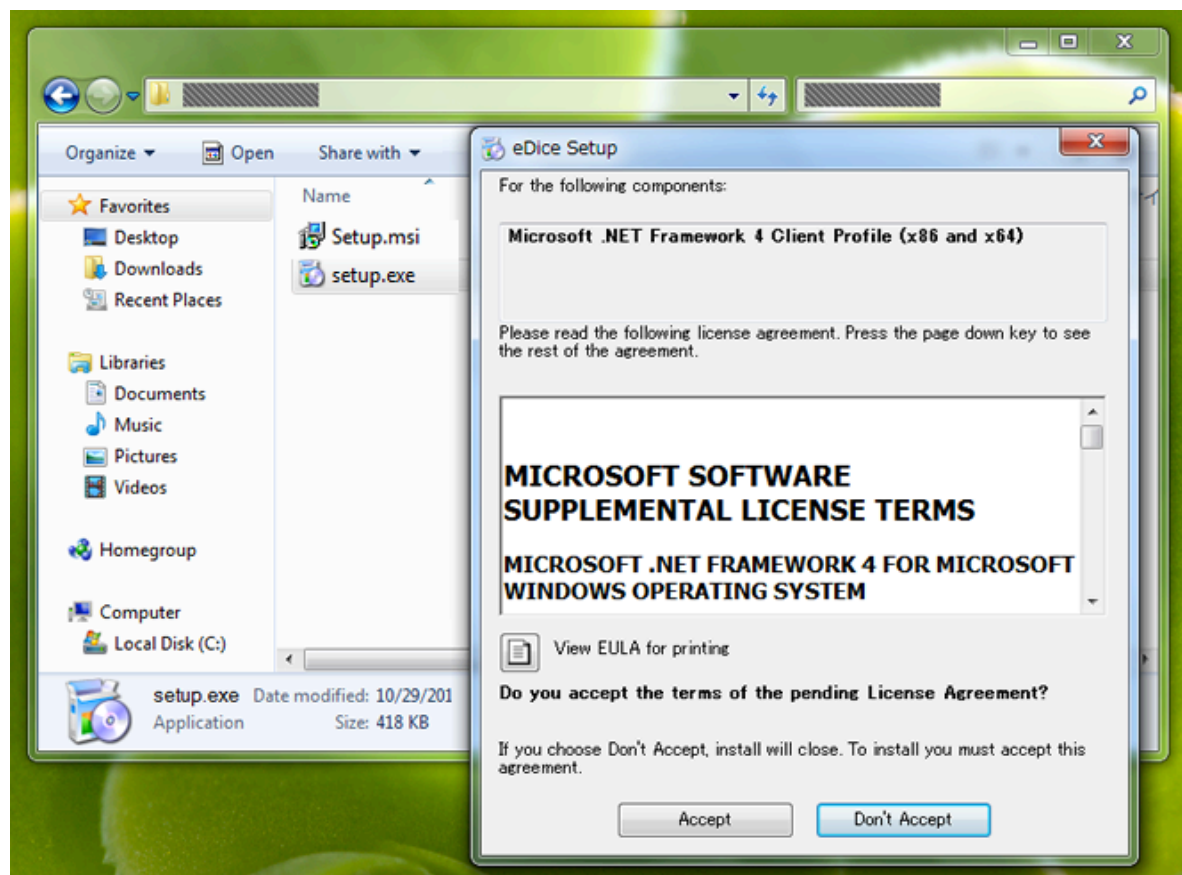

Thank you for your using 7evenTimes.

## 1. Introduction

**7evenTimes** is a simple adoption of an existing Mac software title called TimeLeft4. 7evenTimes allows the user to remind themselves of time-sensitive events. When they set a date and a time, its display window will count down the remaining time. Enable Auto Switcher to let 7evenTimes automatically switch time events every several seconds.

### 2. Installing 7evenTimes

Double-click on **setup.exe** in the delivery package initiate the installation process. If your computer doesn't have it yet, 7evenTimes will first attempt to install **.NET Framework 4**, and you will be prompted for confirmation. (See Screenshot 2.) Then you will proceed to install 7evenTimes. You can use **Setup.msi** to install the application as long as you already have .NET Framework 4, which 7evenTimes requires. You can find the application at the following path: C:\Program Files\MacHouse\7eventimes.

### 3. Uninstalling 7evenTimes

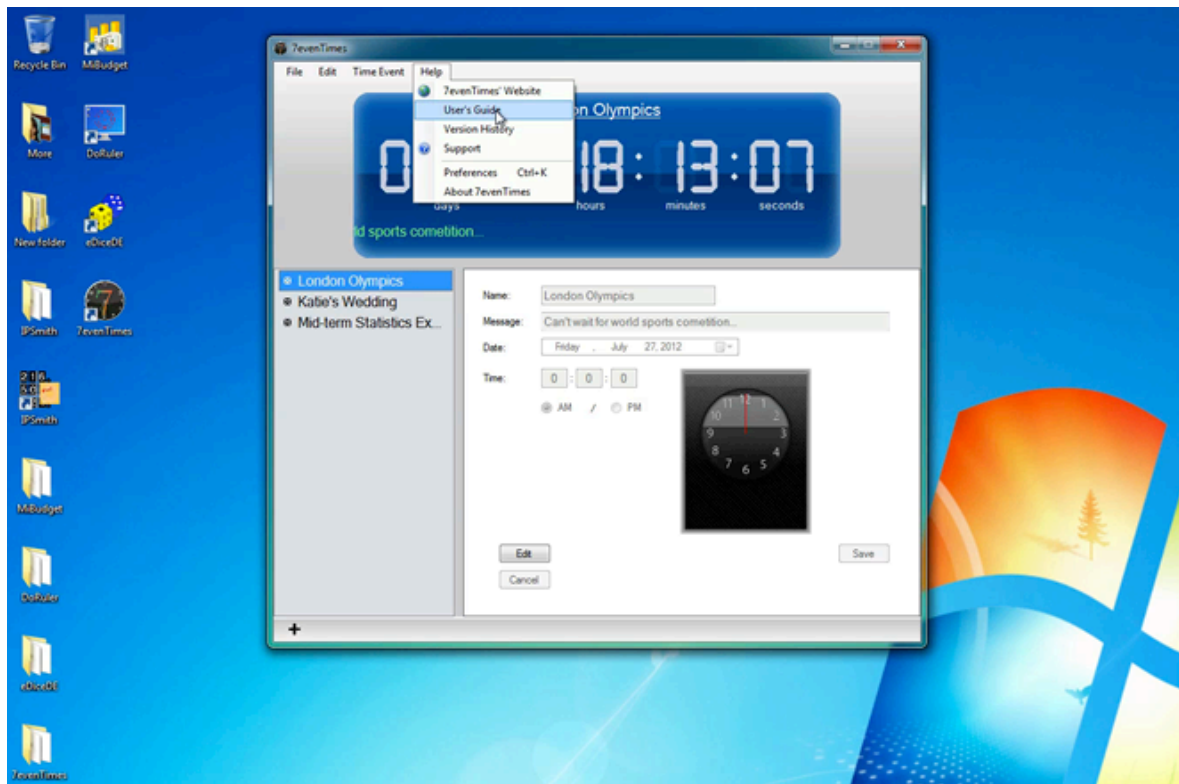

Open Control Panel and choose Uninstall a program. Then double-click on 7evenTimes to initiate the uninstalling process. (See Screenshot 3.) You can also use the original setup.exe or setup.msi to uninstall the application. (See Screenshot 4.) Additionally, when it starts up for the first time, the application will create a folder, which you need to manually trash. You can locate it easily by opening Preferences and navigate to the System tab.
