

Manually create Adobe AIR certificate for apps

First locate the installed/extracted SDK folder.

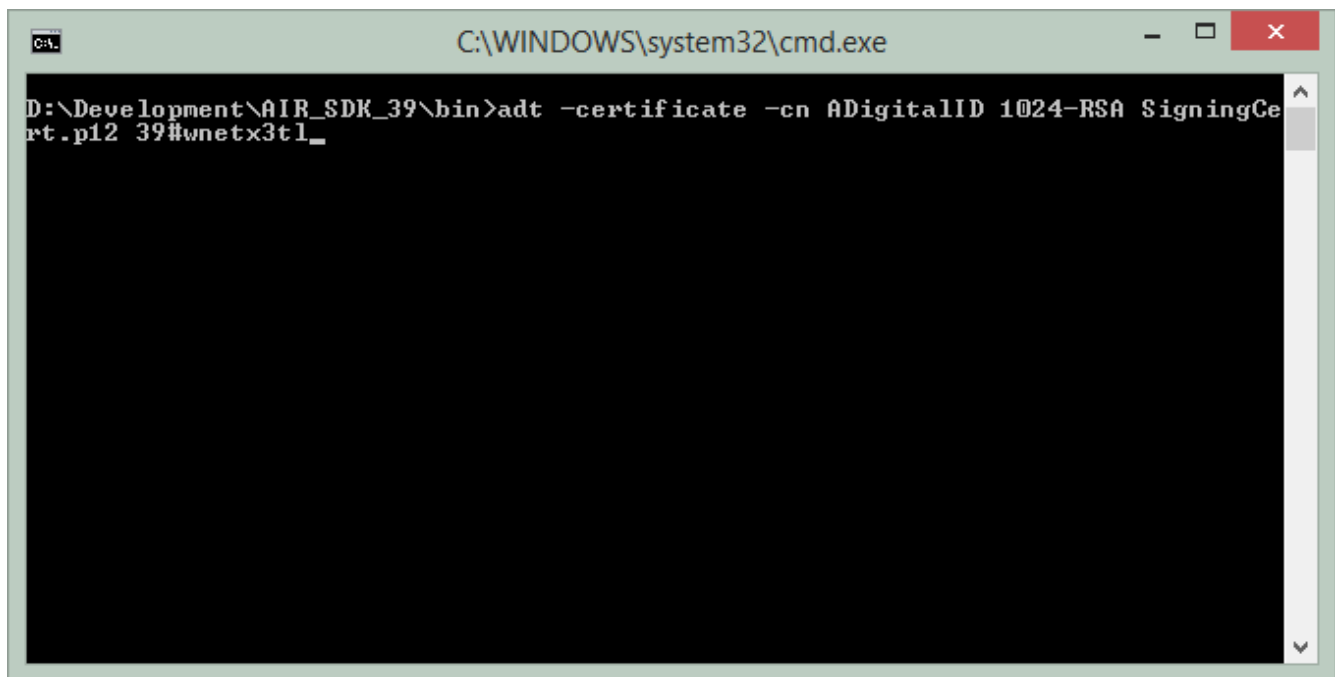

Select bin folder and holding SHIFT key click the right mouse button for a context menu.

<http://www.tech-recipes.com/rx/232/right-click-to-open-a-command-prompt/>

Execute this command to make a new certificate:

adt -certificate -cn *certificate name with no spaces* 1024-RSA or 2048-RSA is encryption type SigningCert.p12 is a certificate filename you can specify folder to save like "C:\Docs\cert.p12" . Use path with no spaces. And last parameter is password.

adt -certificate -cn SelfSign -ou QE -o "Example, Co" -c US 2048-RSA newcert.p12 39#wnetx3tl

You can use -ou Organization Unit -o Organization and -c country parameters.
