Thank you for your interest in the AWT (Amazing Web Tools) – Email Form.

What is the Email Form?

Color customizable Email Form can be easily set up for your website or blog and after filling it out, it sends information to the selected email address. Users use this web tool the most often as a contact form, suggestion form, support form, feedback form, sidebar form, ...

The Form automatically validates entered information and requests a correction if necessary before submitting. Multiple languages are supported for all of texts.

Thanks to FLASH technology, it removes spam (no violation by spam robots waggles). Quick and simple use of Email Form will save your time, which you can spend on more significant things.

Free vs Full version

The FULL version does not show any advertisement. Otherwise it works exactly the same like the FREE version. To obtain a FULL version you need the FREE version plus a license key. The FREE version is available for a free download from and after you purchase the FULL version you will receive a license key. So this way you can basically make a FULL version out of any FREE version you already have downloaded.

FREE vs. FULL Version Comparison Table

	FREE	FULL
Unlimited usage for domain	✓	✓
Resizable Email Form	✓	✓
Automatically check required fields	✓	✓
Head animation	✓	✓
Color customization	✗	✓
No advertisement	✗	✓
Price	FREE	on website

How to use the Email Form

5 easy steps to use the Email Form

1. Download a free version from www.amazing-web-tools.com/email-form, if you still don't have it.

Create a directory; give it a name e.g. "WebTool". Extract all files into that directory.

2. Open (double click) file awt-form_setup.html in your browser.

You just started the SETUP application for creating and setting up your Email Form. The SETUP application is very intuitive and every user will be able to work with it. On the left side you can set up the look of the form, add and remove form controls and set up controls type. On the right side you see how your form looks. Every change appears on the form right away.

When you finish the form setup, click on the GENERATE CODE button on the top left side.

Two sets of code show up on your screen. You will use this code in the following steps. DO NOT close SETUP application yet.

Note: *It is not possible to submit the form in SETUP application.*

3. Insert the first set of code from the SETUP application to the awt-form.xml file.
Open the awt-form.xml file in your favorite text editor (e.g. notepad) and modify it. Delete all the content and insert the first set of code from the SETUP application. Save the file. All the settings for your Email Form are stored in this file.
4. Upload the following files on your server space (example <http://www.mydomain.com/myform/>):

awt-form.swf
awt-form.php
awt-form.xml

Note: All these files have to be in the same folder. Later, you can use your form on any page on your website.

5. Add your Email Form to your www site.

The last step is adding the second set of code from the SETUP application to your website. Insert the code in the place you want to display Email Form. At the end of the code, enter a proper path (URL) pointing to the uploaded file awt-form.swf.

For example if you uploaded the files on:

<http://www.mydomain.com/myform/>

the path has to be modified in the places below:

```
<object width="400" height="325">  
  <param name="movie" value="http://www.mydomain.com/myform/awt-form.swf"></param>  
  <param name="wmode" value="transparent"></param>  
  <embed src="http://www.mydomain.com/myform/awt-form.swf" type="application/x-  
shockwave-flash" wmode="transparent" width="400" height="325"></embed>  
</object>
```

How do I activate FULL version?

You can activate the FULL version from any of the FREE version files using your license key. The license key can be purchased at www.amazing-web-tools.com/email-form/. The FULL version **IS LIMITED to ONE DOMAIN ONLY**. You can use the FULL version on one domain e.g. www.mydomain.com only. Under this domain you can use it in any depth. This means you can have

the Email Form in any folder under that specific domain, e.g. www.mydomain.com/product/ or www.mypage.mydomain.com/ and it will still work fine.

Your license key will look like this:

HCmV%2fEdVPSAEZx

Once you have your license key you need to add it to the SETUP application.

The image shows a web-based configuration tool for generating an email form. On the left, there's a 'GENERATE CODE' button. Below it, several fields are visible: 'License key' (highlighted in yellow with the value 'HCmV%2fEdVPSAEZx'), 'Form width (px)' (400), 'Your email' (@), 'Email subject' (My Contact Form), 'Show head' (checked), 'border' (checked), and 'Form color' (a color picker). On the right, there are three input fields labeled 'Your Name:', 'Your Email:', and 'Your Message:'.

Then follow the steps mentioned above in the section **How to use the Email Form** and add your Email Form on your website or blog. The license key will be found in file awt-form.xml. When you start your form on your website, no advertisement will be displayed and the form will be working in FULL version.

Technical Information

Flash Player Version

The AWT Email Form requires both the server and the user to have Flash Player 8 or later installed. For correct use of the AWT Email Form you and the users of your AWT Email Form need to have a Flash Player 8 or later installed.

Server

The AWT Email Form can be placed on any type of server OS (Windows, Linux ...). Server side script (PHP) is required. No database is needed.

Terms of Use

By downloading the FREE version or purchasing the FULL version you agree to Amazing Web Tools's Terms of Use. The terms of Use can be found at www.amazing-web-tools.com/terms-of-use/. Without agreeing to these terms you will not be able to download and use the FREE nor FULL version of the AWT Email Form.

Support

We have tried to make the component reliable, simple and easy to understand. However, there may be some individual questions and wishes of the user. Please feel free to contact our customer support with any problems, bugs, wishes or compliments :)
