

CPR Tools' BangDisk32

1. INSTALLATION

To install CPR Tools BangDisk32, run setup.exe located in the BangDisk32 directory located at the root of this media. Follow the

directions in the Setup Wizard to install to the desired location.

BangDisk32 is currently supported by Windows XP and Windows Vista.

After installation, you may launch BangDisk32 by clicking 'Start -> All Programs -> CPR Tools -> BangDisk32'; by default, a shortcut to

BangDisk32 will also be placed on the desktop.

2. UNINSTALL

To uninstall CPR Tools' BangDisk32, from Windows XP:

Select 'Add or Remove Programs' from the Windows Control Panel. Select 'BangDisk32' from the Currently Installed Programs menu

and click the 'Remove' button.

To uninstall CPR Tools' BangDisk32, from Windows Vista:

Select 'Programs and Features' from the Windows Control Panel. Select 'BangDisk32' from the list and click 'Uninstall'.

3. GENERAL NOTES

BangDisk32 may only be run from a user account with administrative privileges; additionally BangDisk32 may only be run from one

account at a time.

BangDisk32 automatically detects the drive on which your active copy of Windows is installed; be aware that BangDisk32 will not alert

you to the fact that an Operating System is installed on another device if that is the case.

If you feel that BangDisk32 has incorrectly identified the drive on which your active Windows operating system is installed, you are

advised to 'lock' the drive on which you believe your operating system is installed.
