1. Overview:

BlackBerry U.S. Army BFP Calculator has numerous features, which help you to control your body fat by calculating it time to time.

2. Features:

- Calculate body fat for both males and females.

- Maintain the history of body fat measurements.

- Set various preferences such as default measurement units such as Kg/Lbs, Documents settings .

- You can see the help as and when required to enter proper body measurements.

- Set various Preferences like default calculation of Body Fat percentage according to AR 600-9 or AR 40-591 standard.

3. Installation:

▪ Manual Installation:

To install the software, first of all unzip the downloaded file "BBUSArmyBFC.zip" at desired location on windows base PC.

Now, install BlackBerry Device side application from the folder "BlackBerry USArmy BFC" selecting "BFPCalculator.alx" file with the help of Application Loader of Blackberry Desktop Manager.

- ### Wireless Installation(OTA):

Use following link in Browser of BlackBerry, this will install software wirelessly on your BlackBerry.
http://www.cellica.com/ota/4.2/BFPCalculator.jad

Now you are ready to use the application.

4. Registration:

After successful installation of "USArmy BFC for BlackBerry", on your BlackBerry, Select the Aplications->U.S. Army BFP Calculator icon and click on it. This will open the "BlackBerry USArmy BFC" application. Now, you will see the popup dialog asking for registration key.

Enter the registration key, you got from www.cellica.com, into this Register dialog. Or just press Escape key to enter into application, which means that you are using "BlackBerry USArmy BFC" application as an evaluation copy. You can invoke the Register dialog by selecting the Register menu option either from male or female screen. In evaluation, software allows to calculate Body Fat two times.

5. System Requirements:

Blackberry OS 3.8 or Above.
Support BlackBerry Pearl, Bold, Storm.
