

Books Log v 1.0 – October 2002

This program will help you to keep track all your book collections, such as library books, ebook, audiobook etc.

Main Features:

- Predefined filters to quickly show the record
- Quick type-ahead search function similar to the built-in address book
- User definable multi-level filtering
- Unlimited category, author profile, format and all user definable
- Large notes field for additional information
- Set alarm in the date book when the book is due.

Getting Start

The best way to getting start is build up all the author profile that you knew and define all your format, status and category before start input the actual record.

This is the main screen of the application, You can type-ahead in the left corner input box to perform the search function. The Top dropdown box will let you quickly filter out all the records based on selected Category.

New- Create a new record

Filter- Set the records filter (will explain more detail next section)

Show All- Reset all the filtering and show all records in the database
