

# Content

## Chapter 1 Introduction

About BtoCAD and Other CAD Software .....	2
Using AutoCAD legacy drawings .....	2
Using AutoCAD commands with BtoCAD .....	3
Comparing BtoCAD and CAD to manual drafting.....	4

## Chapter 2 Getting started

System requirements.....	6
Installing BtoCAD .....	6
Starting BtoCAD.....	6
Working in BtoCAD.....	7

## Chapter 3 Working with drawings

Creating a new drawing.....	18
Setting up a drawing .....	21
Setting the text height.....	30
Working with colors.....	32
Setting and changing the grid and snap alignment .....	40
Using the Draw Orthogonal option .....	44
Using entity snaps.....	45
Saving your drawing.....	53

## Chapter 4 Creating simple entities

Drawing lines .....	56
Drawing circles .....	57
Drawing arcs.....	58
Drawing ellipses.....	61
Drawing elliptical arcs .....	62

Creating point entities .....	63
Drawing rays .....	64
Drawing infinite lines.....	65

## **Chapter 5 Creating complex entities**

Drawing rectangles .....	70
Drawing polygons.....	71
Drawing polylines.....	72
Drawing splines.....	74
Drawing a closed spline.....	75
Drawing donuts.....	76
Drawing wipeouts.....	77
Creating boundary polylines .....	79
Adding hatching .....	82

## **Chapter 6 Viewing your drawing**

Redrawing and regenerating a drawing .....	90
Moving around within a drawing .....	90
Changing the magnification of your drawing .....	92
Displaying multiple views .....	96
Controlling visual elements.....	100

## **Chapter 7 Working with coordinates**

Using Cartesian coordinates .....	104
Using three-dimensional coordinates.....	111
Polar.....	118
Object snap trace.....	118

## **Chapter 8 Working with the BtoCAD Explorer**

Using the BtoCAD Explorer .....	120
Organizing information on layers.....	124
Controlling layer printing .....	131

Working with linetypes .....	135
Working with text fonts and styles.....	143
Working with coordinate systems .....	147
Using named views .....	149
Working with blocks and external references .....	152
Working with dimension styles.....	157

## **Chapter 9      Getting drawing information**

Specifying measurements and divisions .....	160
Calculating areas.....	162
Calculating distances and angles .....	166
Displaying information about your drawing .....	167
Tracking time spent working on a drawing.....	169

## **Chapter 10     Modifying entities**

Selecting entities.....	172
Modifying the properties of entities .....	177
Deleting entities .....	179
Copying entities .....	179
Rearranging entities .....	185
Breaking and joining entities .....	195
Editing polylines .....	202
Exploding entities .....	207
Chamfering and filleting entities.....	207

## **Chapter 11     Working with text**

Creating line text .....	216
Creating paragraph text.....	217
Working with text styles .....	219
Formatting text.....	220
Setting the paragraph text alignment.....	222
Changing text.....	223

hanging paragraph text .....	225
Using an alternate text editor .....	227
Working with text written in different languages.....	229

## **Chapter 12    Dimensioning your drawing**

Understanding dimensioning concepts .....	232
Creating dimensions.....	234
Editing dimensions .....	243
Understanding dimension styles and variables.....	245
Adding geometric tolerances .....	255
Quick Dimension.....	261

## **Chapter 13    Working with blocks, attributes and external references**

Working with blocks.....	264
Working with attributes.....	269
Working with external references .....	275
Attach raster image.....	285

## **Chapter 14    Printing drawings**

Getting started printing .....	290
Defining layouts for printing .....	290
Customizing print options .....	300
Printing or plotting your drawing.....	314

## **Chapter 15    Drawing in three dimensions**

Viewing entities in three dimensions.....	318
Creating three-dimensional entities .....	320
Editing in three dimensions .....	335
Hiding, shading, and rendering.....	339

## **Chapter 16    Working with other programs**

Saving and viewing snapshots.....	344
-----------------------------------	-----

Using images in a drawing ..... 345  
Using data from other programs in BtoCAD drawings ..... 347  
Linking objects to drawings ..... 349  
Using BtoCAD data in other programs .....351

**Chapter 17 Customizing BtoCAD**

Setting and changing options ..... 359  
Customizing menus ..... 374  
Customizing toolbars ..... 380  
Creating and replaying scripts .....398
