LOGOSAREA.COM— WHAT'S IT ALL ABOUT?

*LogosArea.com is an internationally acclaimed logo design and publishing company which excels in making eye-catching, distinctive and visually grabbing logos. From the concept to the design, we'll do it all for you to discover, develop and implement an image that shall become the **trademark of your entire organization**. At LogosArea, we understand how important first impressions are; therefore we work to make logos that are **powerful** and **long-lasting**. LogosArea will give you a vast domain of logos to choose from our ready-made collection OR... you can have a custom logo to your choice... something exclusively for you! From **Illustrative** to **graphics** and **font-based logos**, you can find it all right here.*

Logosarea.com... where you can find

world's BEST logo designers

Have you ever wondered what's the significance behind the little icon placed on products, in brochures etc called a logo? Why do companies have logos anyway?

A custom logo design can project professionalism, unify product lines, differentiate products, and create a brand. Without the right logo, your success in each of these areas could be limited.

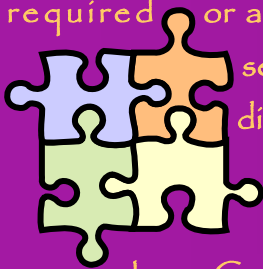

OUR PROCESS

Over the years, LogosArea has developed a fantastic, fool-proof, robust and swift process for the complete logo design process. The best thing about this process is, that it results in logos that meet, rather exceed customer expectations without wasting their time or bogging them down with unnecessary details. Here's how we do it:

A team of logo designers gets in touch with the client as soon as he/she places the order. They get basic information from the client about the company, the kind of logo required and the kind of message it should convey. The client tells us about any color preference, logo design preference he/she has. And if there are logos that the client likes, we like to see them too so that we get a better idea about the clients' choice. At this time, we would also like to know if there's any slogan that the client wishes to be a part of the logo and whether a vertical logo is required or a non vertical one. After this brief session, our logo designers

set to work. They think, brainstorm, scribble, generate designs, discuss, improve and TADA!!! We have around 4–5 original logos created using latest software including Adobe Illustrator, CorelDRAW, Macromedia Freehand, Adobe Photoshop, Corel Photo-Paint, Jasc Paint Shop Pro etc. The client chooses from amongst these logos and we make amendments if required before delivering a logo that will become the corporate identity of the client's company for years to come.

LOGOSAREA: LEADING BY DESIGN

What makes us a success is a pleasant mix of few factors that we as a company strongly believe in and give immense weight to.

Keys of Effective Logo Design at LogosArea.com

Looking within

We try to develop logos that represent a company's corporate identity, or a business's essence. For this, we look within organizations, the people running them and try to gauge what drives them. This helps us develop logos that are more representative and enhance a company's outlook and profile rather than going against it.

Time is Critical

*At a time when every one is in a rush all the time, we believe that your time is precious and deadlines **MUST** be kept. Our normal delivery time is 48—72 hours whereas urgent orders are delivered within 24 hours. Our designers will work round the clock to deliver you the product promised to you well in time.*

Good Performance No Matter Where!

A successful logo can't be just creative or clever. Because a logo ends up being an important guest at many occasions, it absolutely must perform and behave well no matter what. And that is what we ensure our logos do!

Catches the Eye

A good logo is one which you just see and know it! A good logo catches the eye - it makes the observer curious or engaged, if only for a short moment? a moment in which an image and the existence of your company is embedded in the mind rather than filtered out with a million other daily stimuli.

LOGOSAREA: LEADING BY DESIGN

Memorability

We believe that logos can go a long way in effective branding. Hence we strive to develop logos which will stay at the forefront of the onlooker's (your potential clients') mind. That way they'll think of you next time they have a need.

Uniqueness

We ensure our logos help you stand out from the crowd. Typical logos are no good and will not help you in branding or differentiation. Our dynamic logo designers are brimming with countless original ideas to make logos that suits you best.

Unity

Unity among the different elements in the logo is crucial and something which is not compromised on in any of our logos. The logo must fit together as a single unit, and not just appear as a jumble of elements pasted together.

Meaningfulness

Our logos have depth and meaning to them and are not JUST a piece of art. This is so that the logo can spread the company's message about the distinguishing characteristics of its business.

WHAT OUR CLIENTS SAY ABOUT US...

LogosArea.com

Logos made by LogosArea are expressive. It is the best "face" of your company you can have.

I love the logo of my company that LogosArea made for me. It looks great. I've used it on the web and in print media. All elements are discernible even when reproduced in small sizes.

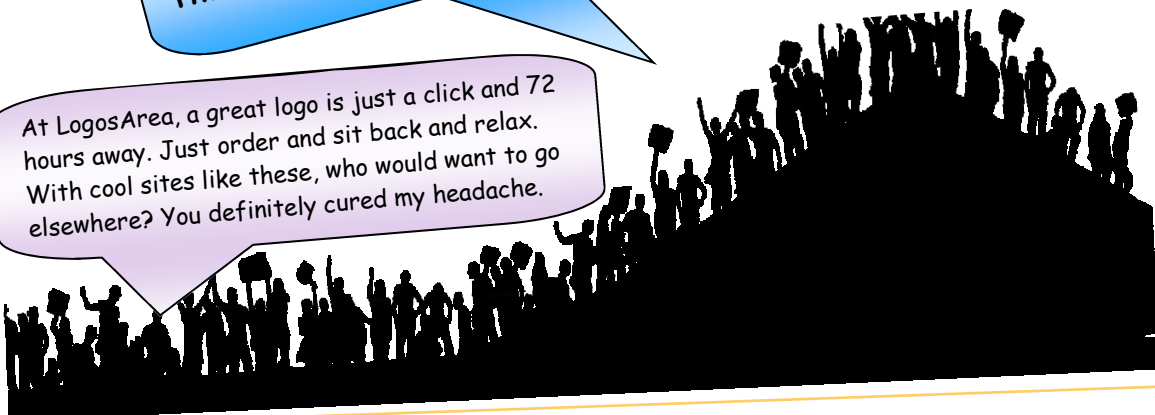

One thing that stands out in you guys is that you have a great customer service. Your staff has been patient, understanding and committed. They went through several iterations with me in the design face till they made what I really wanted.

I requested for a rush up logo and bingo, had one made exclusively for me in a day. Thanks for saving my skin!

I did not know that a tiny logo could give such an impressive, corporate look to my small business.

At LogosArea, a great logo is just a click and 72 hours away. Just order and sit back and relax. With cool sites like these, who would want to go elsewhere? You definitely cured my headache.

We, at LogosArea.com, look forward to designing Logos for your company which will become a pride for all.

We would love to hear from you, answer your queries and work in collaboration with you.

Remember!

More than half of all people process information primarily visually, while auditory and kinesthetic processing come in second and third, respectively. Hence, visual identity has a big impact. An effective logo can do wonders by giving you a recognizable, distinctive look.
