# CardMaker2012 Product Description

Background

CardMaker2012 is a computer application that allows you to easily design various simple one page documents innovatively. These documents include one page cards like post cards, invitation cards, thank you cards and more. The application avails you various options including choosing your own picture for the card background, choosing alignment of the text (left, center or right), choosing different colors and fonts for the text, and optionally choosing borders. Most of the selections involve simply clicking a checkbox.

This application presents you with two screens namely the *draftview* and the *workboard*. Most of the editing and option choosing is done on the *workboard* . Anytime you can see how the final product will look like by clicking on the (green) *refresh* button. This will show you the look of the card in the draft view. On completion of the work, you can preview it and later on save it into a picture file on your disk.

System Requirements
CardMaker2012 requires the following to run efficiently:-
Desktop personal computer or laptop
Microsoft Windows XP or later version with the following:-
      Microsoft .NET framework 4 client profile (x86 and x64)
