

There are 2 steps of installation.

1. You need to Install **FirebirdSQL database** (Firebird21_32.exe) first.

no need to change any configuration, just click on next.... until finish.

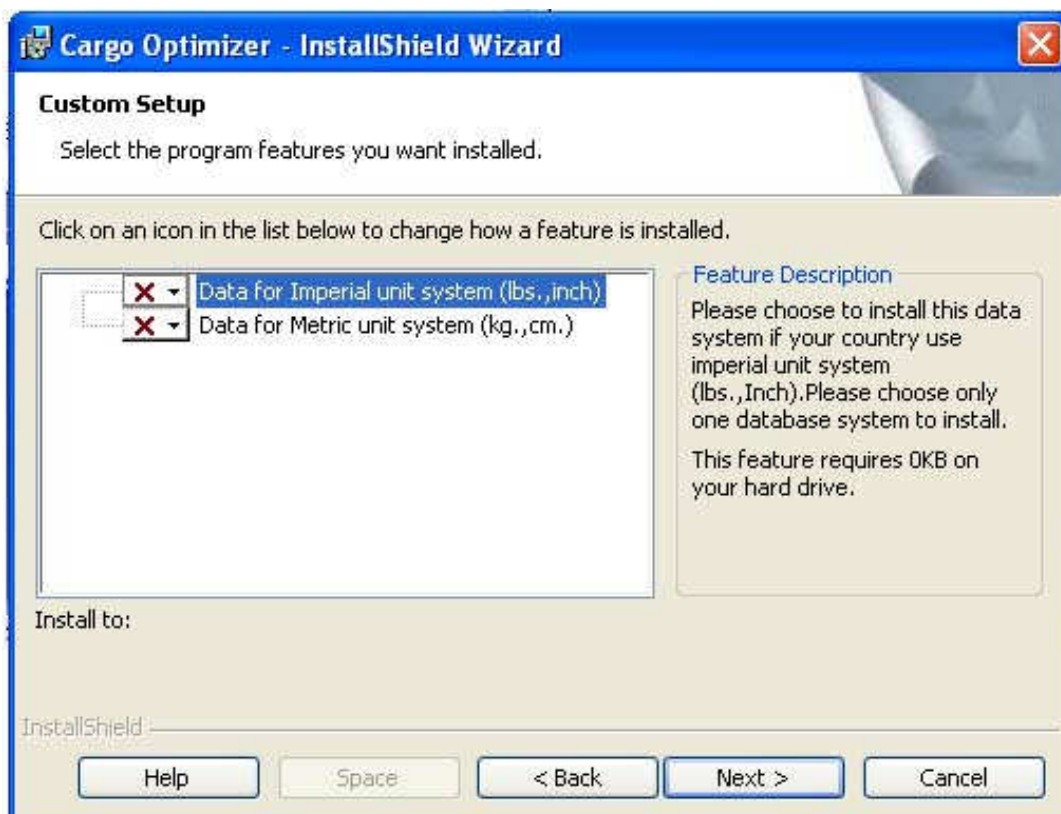

2. Then install **Cargo Optimizer Enterprise** (setup.exe).

Don't forget to choose database of your unit system (metric/imperial) on installation process.

Installation instruction for Cargo Optimizer

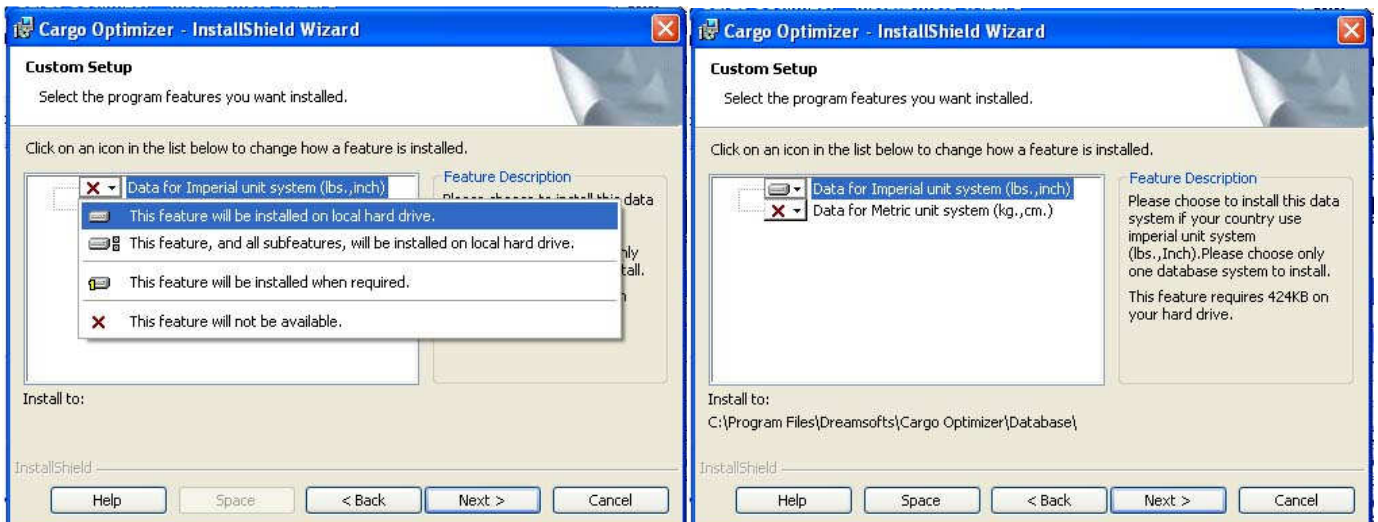

1) On the installation setup process,

You need to choose database unit system on "**Custom Setup**" page

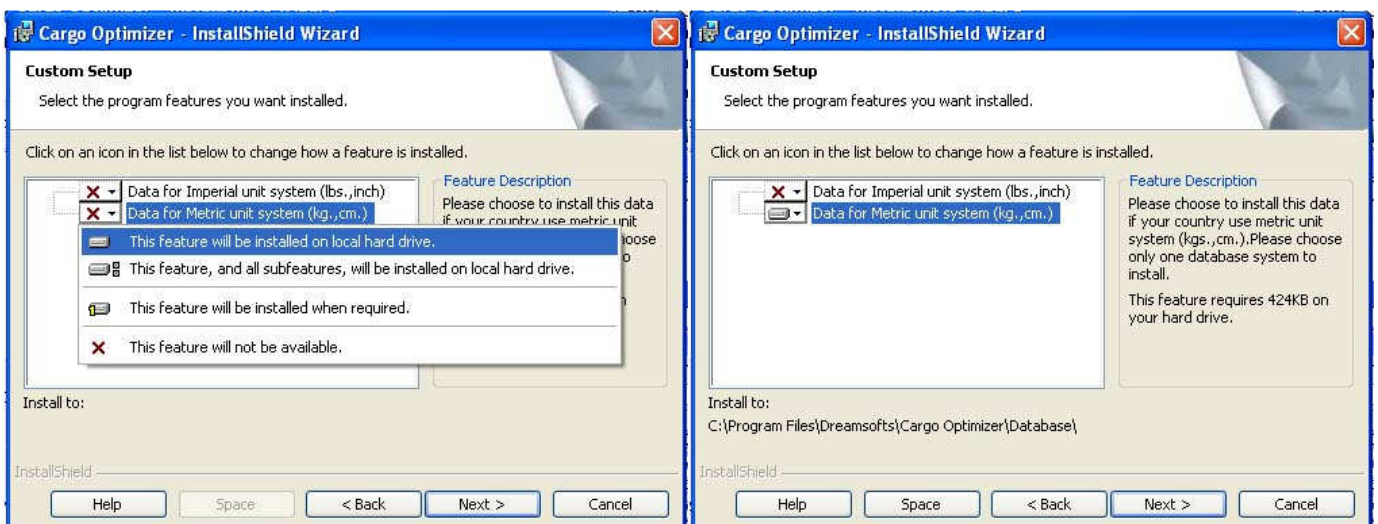

If you use Imperial unit system (lbs., inch),

Please set "**Data for Imperial unit system (lbs., inch)**" as follow;

And then click "**Next >**" to next step
 If you use Metric unit system (kg., cm.),
 Please set "**Data for Metric unit system (kg., cm.,)**" as follow;

And then click "**Next >**" to next step

Note:

1. If you don't choose any data to install, software will not execute.
2. If you choose to install both data, software will working in Metric unit system.

For Windows Vista, after install software please do this step:

1. Right Click on icon Shortcut of Cargo Optimizer on Desktop, then click menu **Property**
2. Go to Tab -> Compatibility -> Compatibility Mode checked on **Run this program in compatibility mode for "Windows XP SP2"**
3. Checked on **Run this program as Administrator**
4. Click **OK**
