1500 Health Insurance Claim Form Filler - Version 02/12

Type, print & save using your Macintosh or Windows computer.

System Requirements

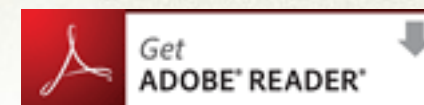

This fillable form requires Adobe Reader, version 9 or newer to open, print and edit the information typed in the form fields.

Note: Mac and Windows 8 both have a default PDF viewer. Be sure to open Adobe Reader first, then the CMS-1500 PDF from within Adobe Reader to save and print the claim properly.

System Requirements

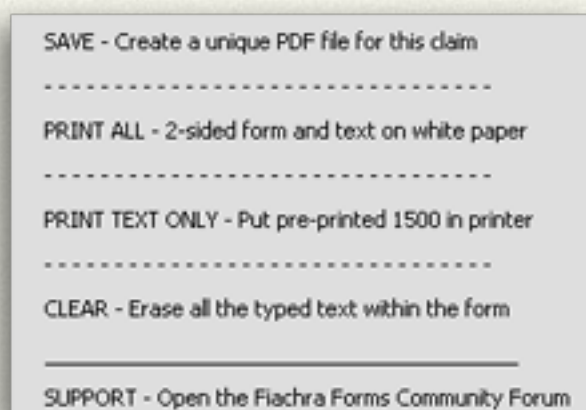

[Adobe Reader 9 or Newer](#)

[Download Current Version](#)

Saving with Adobe Reader

This form is a Rights Enabled PDF that allows the user to fill, save, and edit the claim form.

Once the form is completed, use the built-in menu to save, print and clear the form. There is also a link to our community forum, where you can post questions or comments about the CMS-1500 PDF.

To create a template, a claim to use over and over, fill in the form with data you need to re-use, then choose Save and name your template. Then open the template you just saved, enter in the rest of the data fields, then save as patient_1.pdf. To do another claim, open the template again, type in next patient's information, then save as patient_2.pdf.

Printing Form and Text

Open the file CMS-1500.pdf and fill in the patient information. In the menu choose Print All. This option will print the red form and the backside. Be sure to set the printer for two-sided printing.

Note: It may not be possible to replicate the form color (OCR Red, Flint J-6983) with your printer. We recommend sending a sample first, or print "Text Only" into commercially printed 1500 Health Insurance paper claim forms to ensure your claim is accepted and processed.

Printing Text Only

Put a commercially printed 1500 paper claim in the printer and then in the menu, choose Print Text Only. The form has already been aligned, and will place the text in the proper spaces for you.

Form Calculations

This feature automatically adds up the charges (1-6 in Box 24F) for the total charge in Box 28.

To manually edit the calculation, you can turn it off by clicking the button at the bottom of the form.

User License

Purchase of the CMS-1500 PDF entitles the user to perpetual use of the form, for an unlimited amount of time. A licensed user may open, use, access, display and copy the CMS-1500 PDF on up to two (2) computers. This license and PDF file may not be shared, transferred or used by others. If your agency has additional user licenses, the purchaser must be willing to manage the deployment and utilization of each license of the CMS-1500 PDF within the agency.

Thank you for ordering from Fiachra Forms.
