

# How to Print on Labels.

---

©2010 Copyright by Lars Sams

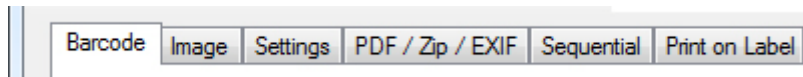

Some sample files have been included in the setup file and they are located at Documents\Code Barcode Maker Pro\

The Help file is at Start > All Programs > Shareware by Lars Sams > Code Barcode Maker Pro

## Let's get started.

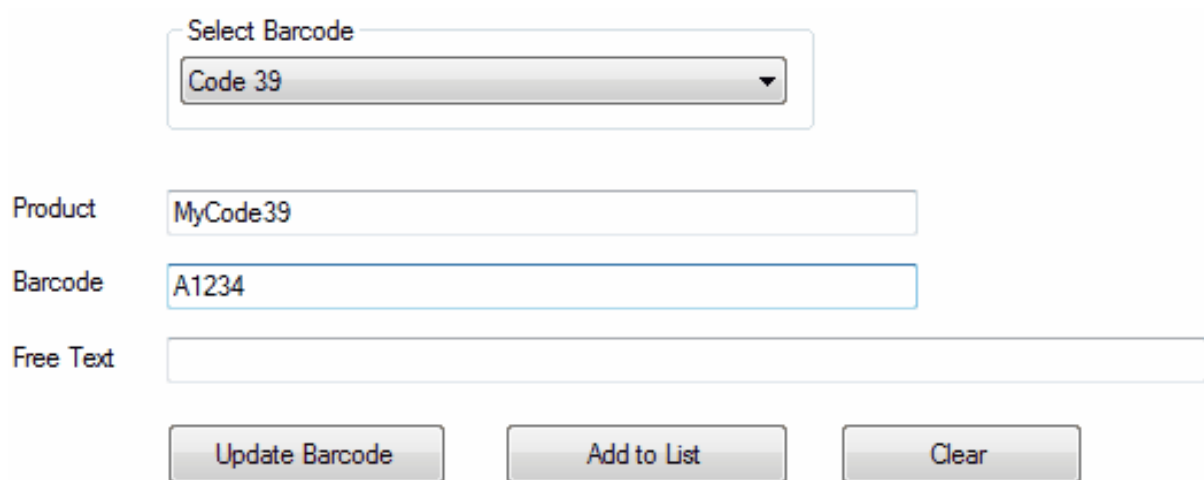

Run Code Barcode Maker Pro

Make sure you have selected the Barcode TAB. (Please look at the Picture below)

## Add a Code 39

Select the Code 39 barcode in the Select Barcode area. (Please look at the Picture below)

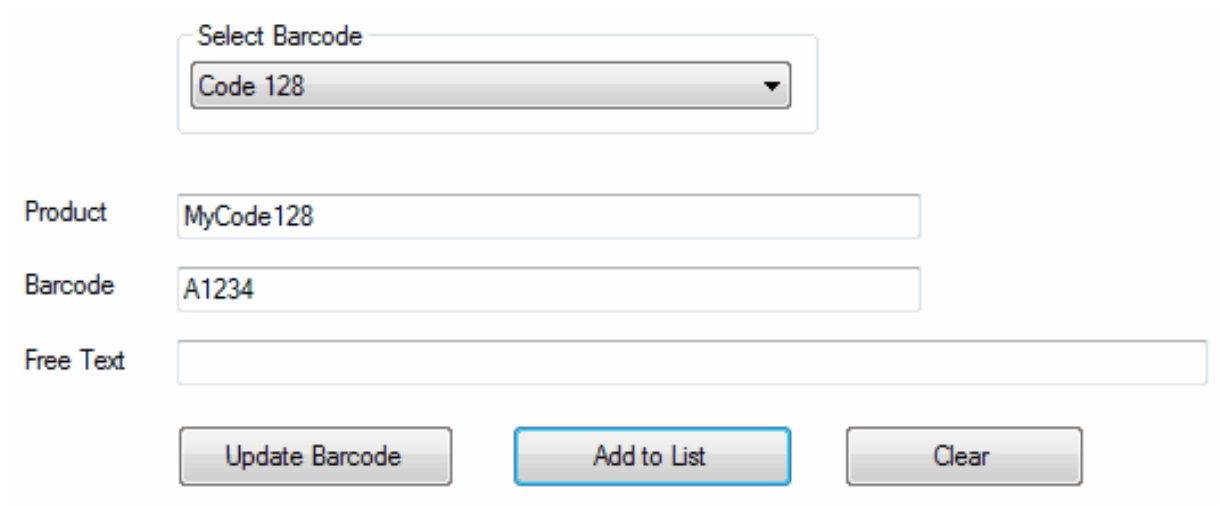

A screenshot of the 'Add a Code 39' form. At the top, there is a 'Select Barcode' dropdown menu with 'Code 39' selected. Below this are three text input fields: 'Product' containing 'MyCode39', 'Barcode' containing 'A1234', and 'Free Text' which is empty. At the bottom of the form are three buttons: 'Update Barcode', 'Add to List', and 'Clear'.

Fill in the information for the barcode. For the Code 39 if fill in A1234 a checksum will be added automatically. All but the Barcode is optional. (Please look at the picture above)

The Barcode is shown in the Barcode Area. (Please look at the Picture below)

Select the Code 128 barcode in the Select Barcode area. (Please look at the Picture below)

Select Barcode

Code 128

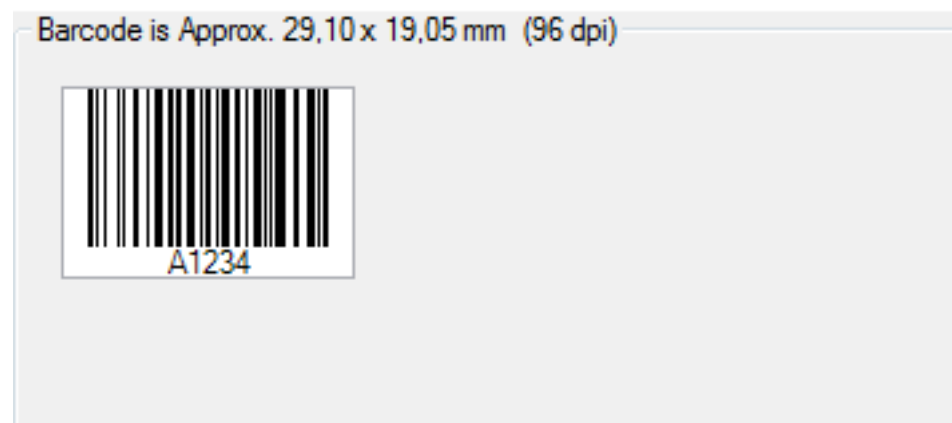

Product MyCode128

Barcode A1234

Free Text

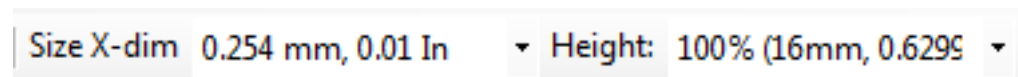

Update Barcode Add to List Clear

Fill in the information for the barcode. I have filled in A1234 for the Code 128 a checksum and will be added automatically, but it's not shown in the human readable text. All but the Barcode is optional. (Please look at the picture above)

The Barcode is shown in the Barcode Area. (Please look at the Picture below)

Code Barcode Maker Pro has predefined GS1 recommended size for the barcode and you can quickly change the size by using the Rec.Size and Height in the Tool Bar (icon bar). We use the default, Rec.Size 100% and Height 100%. (Please look at the Picture below)

Size X-dim 0.254 mm, 0.01 In Height: 100% (16mm, 0.6299 In)

Click on the Add to List button. (Please look at the Picture below)

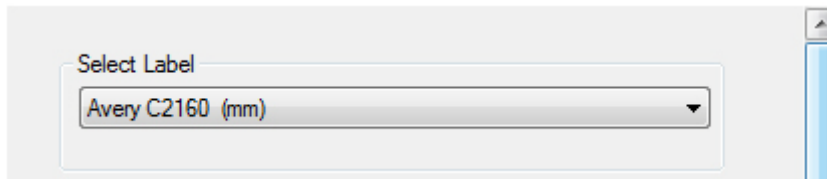

Add to List

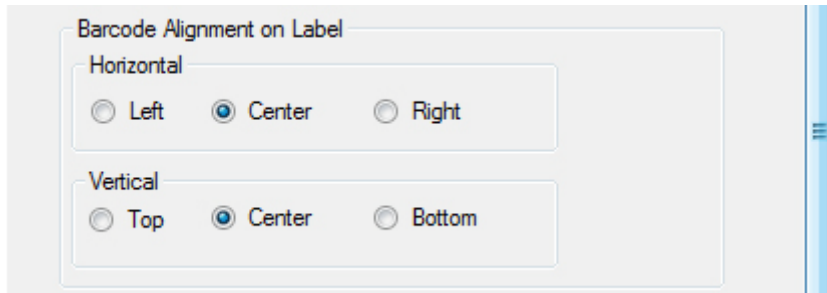

The Code 128 barcode have been added to the Barcode List (Please look at the Picture below)

Select the label you would like to use. I will use the Avery C2160, it's in the A4 size (millimeters). You will be able to use Letter size (in inches) as well. (Please look at the Picture below)

You will also be able to align the barcode on the label, by default its Left and Top, but in this case we set it to Center and Center. (Please look at the Picture below)

## Lets print the barcodes on labels

We are not going to make any changes to the label, but I will fill in 5 in the Labels to Print of each item and also I have checked the Outline Labels and Check to see if Barcode fits label. (Please look at the Picture below)

Label Measurements

Label Width: 63,5 mm

Label Height: 38,1 mm

Horizontal Pitch: 66 mm

Vertical Pitch: 38,1 mm

Adjust Barcode Placement

Left/Right: mm

Up/Down: mm

Preview / Print

☒ Labels to Print of each item: 5

☐ Page(s) to print of each item: 0

☒ Outline Labels

☒ Check to see if Barcode fits label.

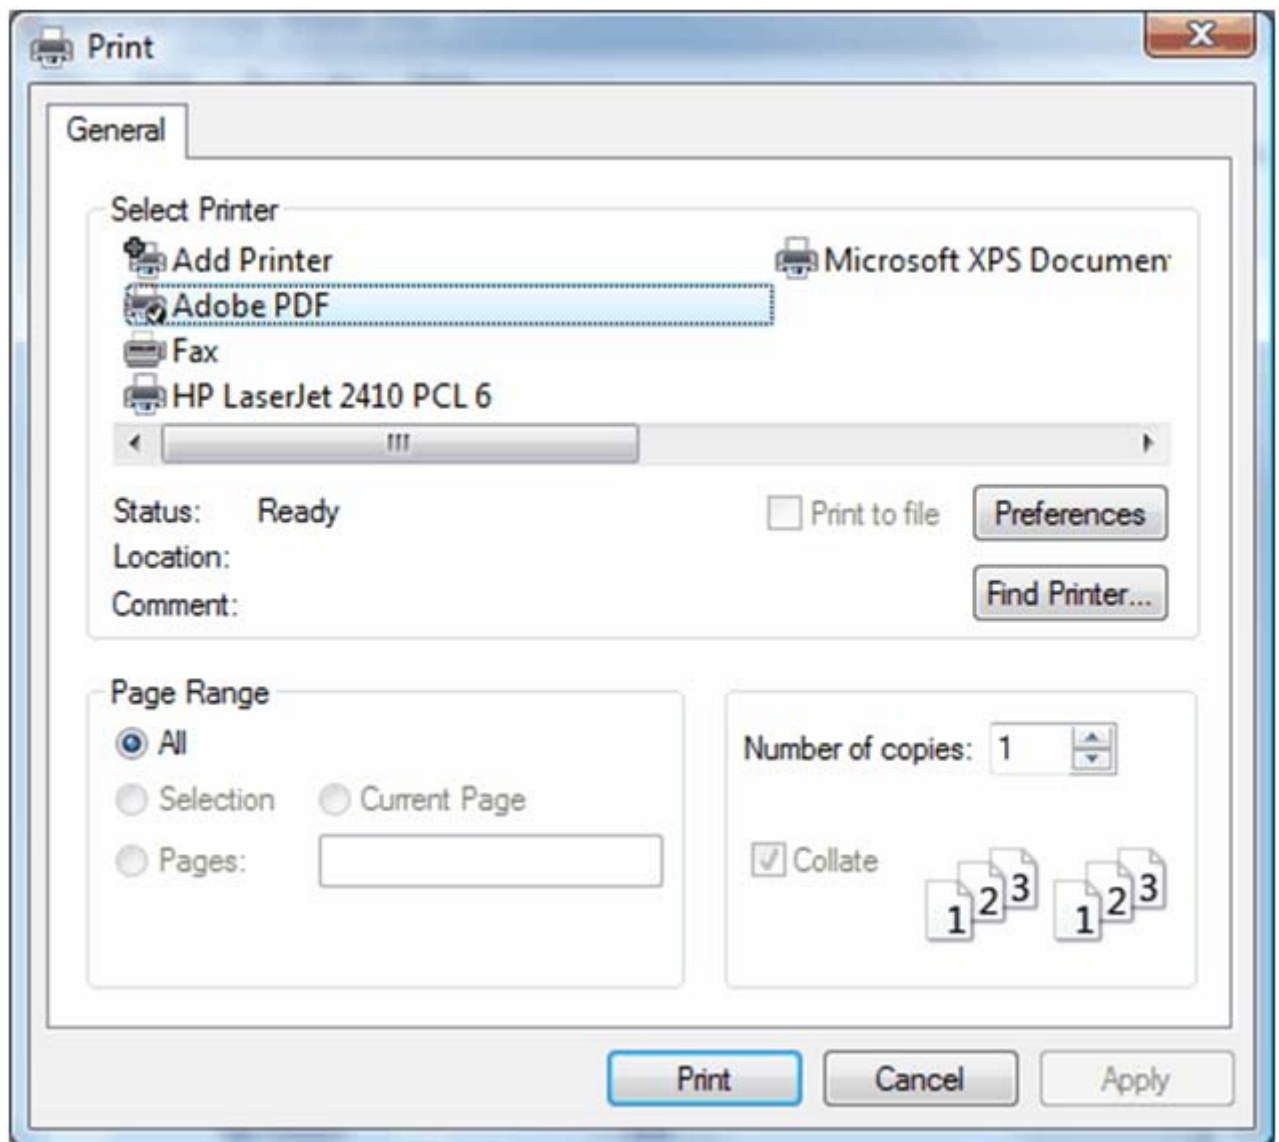

☐ Adjust barcode Height, if barcode is taller than label.

Preview Print

 Use the Preview icon in the tool bar or click on the Review button to preview the barcodes on the labels.

 Use the Print icon in the tool bar or click on the Print button. I will click on the Print icon

The Print dialog window will show. Select the printer you would like to use by clicking on it, when ready click on the Print button. In this case I use Adobe PDF. (Please look at the Picture below)

This is how the label sheet looks at 25% magnification in Adobe. (Please look at the Picture below)

This is how one label looks. (Please look at the Picture below)

## Contact

Now you know how to print barcodes on labels. If you have any questions, please e-mail [info@barcodemaking.com](mailto:info@barcodemaking.com)
