Installation

You can download a package named codememo.zip from www.eusoftware.com/codememo.php. Extract the file codememo.prc from it and use a install tool of Palm to transfer it onto the handheld device. Then the installation is done.
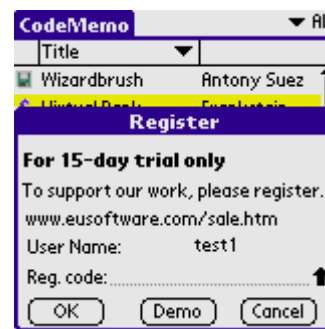

Login Screen

If it is your first time to use the application, the default password is '8888'. If you want to make the input un-readable, you can check the 'Mask PIN' option.
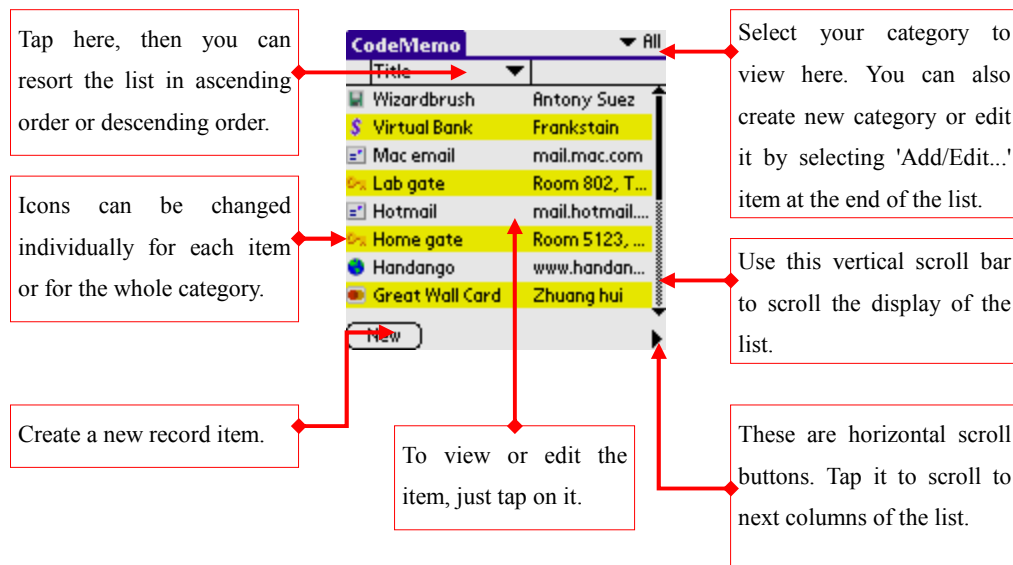

You will be asked to input a reg. code to accomplish the registration, or you can press the 'Demo' button to use it as a demo version with full features for 15 days.
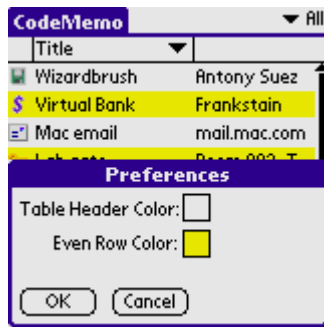

To get a registration code, please visit www.eusoftware.com/sale.htm.

Main Screen

After you enter the application, the screen will look like the following. This is the main screen.

Tap here, then you can resort the list in ascending order or descending order.

Icons can be changed individually for each item or for the whole category.

Create a new record item.

To view or edit the item, just tap on it.

Select your category to view here. You can also create new category or edit it by selecting 'Add/Edit...' item at the end of the list.

Use this vertical scroll bar to scroll the display of the list.

These are horizontal scroll buttons. Tap it to scroll to next columns of the list.

Tap the 'Preference' Item of Options menu of main screen, it will pop out the preferences form. You can set the table color here.

Tap the 'Change Password' Item of Options menu of main screen, it will pop out a form for you to change the log-in password.

Record View Screen

The category of current record.

Tap these two buttons to view next or previous record item. You can also press 'PageUp' & 'Page Down' hardware buttons to that.

Return to the main screen.

Delete the current record and return to the main screen.

Edit current record.

Record Edit Screen

Select the category of this record. The labels and icon will be changed accordingly.

Press this icon to add/view the note for this record.

Let the system to generate a password for you.

Category Edit

As it shows on the right, at the bottom of the category selection list, there is a 'Add/Edit…' selection which allows you to edit and create category data.

Tap it. The screen will look like the following.
You can tap the buttons here to create, delete and edit the category.

If you choose to create or edit a category, the screen will be like the right. You can set the name, the icon and the data entry of the category. Checking the box on the right of the data entry is to set that entry as a password. That means you will get a code-generating button beside that entry while you edit the record of that kind of category.
