

Couponer, software for sorting coupons F-A-S-T and in S T Y L E. Version 1.00  
Copyright 2011 by Eric and Melanie Meyer. All Rights Reserved.

#### Overview:

This program is intended to be used with a bar code scanner, of type laser. Manually typing in coupon bar codes is strongly discouraged and will defeat the time saving qualities of this program. This program learns, by the user entering the data manually for new coupons, the items it sorts. It stores a record of the count of each type of coupon it processed. The counter for coupons can be adjusted, up, down or simply reset to zero. This program records the user's input for coupon UPC (via bar code scanning, if attached), manufacturer, date of expiration as month and year, value of coupon, number necessary to participate with coupon, category, and perhaps most important, the user settable bin number (over 250 bins supported). The program speaks in English to the user in a female voice.

#### What this version does NOT feature:

- 1) Processing of date to alert user to old expired coupons. This will be added in a later version.
- 2) Printing support of lists. This will be added in a later version.
- 3) Fancy GUI interface. This is planned in a later version.
- 4) Features you suggest may be added in future versions. Please contact me with feedback.

#### How to Install this product:

Unzip the files. You will see these files:

couponer100t.txt  
couponer100d.doc  
couponer100p.pdf  
couponer100.exe

You will need to place the EXE file in a directory of your choice. The desktop is suggested, because you will be able to see it and run it with little effort. However, anywhere on your system is supported.

The program will look, when run the first time, for a directory called [c:\couponer](#) on your c: drive. If it does not exist, it will automatically create the folder for you, and will automatically place its files in that folder.

If you ever want to delete Couponer, simply remove the EXE file, the two help files, and the folder marked [c:\couponer](#) from your system. You will be welcome to reinstall Couponer at a future date if you so choose.

#### LICENSE:

This program is Shareware. You may use it, copy it, give it away freely. You may sell it for a nominal fee not to exceed \$2 administrative disk/disc copying and advertising costs per copy sold. You may NOT reverse engineer, decompile, modify or attempt to export into countries banned from U.S. Computer software technology.

Please, if you like our program, please support us! Your \$6 donation, or any donation you wish, will be appreciated. If you donate \$6 or more, I will furnish you an unlock code to allow the software to stop reading the advertising blurb at startup for the life of the version, including small bug fix versions.

#### HOW TO UNLOCK:

All features are presently, by default, enabled. However, the difference between the registered and

unregistered versions are the startup blurb is audible on the unregistered version. To register, send us a check, or money order, and write the secret code we will send you in a notepad file. Save the file to the directory of [c:\couponeer](#) by naming the file "registration.txt" The next time you load Couponeer, it will automatically know where to look for the file if it is in the proper directory and file name, and doing this will completely silent the startup advertising blurb, and cause a silent and thank you message appear instead of news from USALL Systems Company.

If you wish to communicate with us, you may write to the programmer at:

Eric S. Meyer  
Couponeer Project  
119 West Lincoln Street Apt 2  
Findlay Ohio 45840

or you may call me at 888-669-8255 anytime.

My e-mail is: [support@usall.com](mailto:support@usall.com)

I appreciate and thank you for your interest in my products and look forward to welcoming you as a sponsor for my programming efforts. I truly value your support and help for making my continued programming worthwhile for me and my family.

Best Regards,

Eric S. Meyer
