

To control mac printing, the mac computer must print to the shared printer on the Windows computer that has Master Print Release Station installed.

To set up the Windows computer that has Master Print Release Station installed, share the printer on the network and then connect to the printer from the MAC, follow the steps below for the Windows PC (or Server) that has Master Print Release Station installed and the MAC.

Step 1: On the Windows PC (or Server) that has Master Print Release Station installed

First, Enable the LDP Print Service using the following steps:

1. Click **Start**, and click **Control panel**
2. Click **Programs** and then click **Programs and Features**
3. Click **Turn Windows Features on or off**
4. Click to expand **Print and Document Services**
5. Check the box for **LDP Print Services**
6. Click **OK** and close the **Programs and Features** window

Next, share the Windows printer on the network using the following steps:

1. Click **Start**, type Devices and Printers in the **Search** text box
2. Click **Devices and Printers** from the list above
3. Right-click on the printer to be shared and click **Printer properties**
4. Click the **Sharing** tab and click **Change Sharing Options**
5. Check the box to Share this printer
6. Set the name for the share

(**Note**: use a share name with no spaces, **Example**: Windows_HP_Printer)

7. Click **OK** and then close the **Properties** and **Devices and Printers** windows

Step 2: On the Mac

The last step, connect the printer to the MAC using the following steps:

1. Go to **Start Applications** then **Utilities** and then **Printer Setup Utility**
2. Hold down the **Option** key and click the **More Printers** button
3. From the top menu select **Advanced**

Note: If you don't get an **Advanced** button (Snow Leopard 10.5) right click (or equivalent) on the printer's toolbar and click **Customize**, and then drag and drop the **Advance** tab on the toolbar.

4. From the **Device:** field select **LPD/LPR Host or Printer**
5. In the **Device URL:** type `lpd://WindowsPCName/PrinterShareName`

6. Click the **Add** button

Test printing to the Windows printer from the MAC.

If you just want to control the mac printing, CZ Popup for Mac is not required. Skip Step 3.

Step 3: CZ Popup for Mac provides the following additional features:

1. Print job notification;
2. Allows users to change the print job name (description) for privacy;
3. Allows users to create a user ID and (or) password that they will use to release their print jobs on the print release station.

Mac OS X/Classic: CZPopup_Mac.app.tar and release_ip.ini

1. Open release_ip.ini, enter the computer name or the IP address of computer that has Master Print Release Station installed.
2. Copy CZPopup_Mac.app.tar and release_ip.ini to Mac computer.
3. Double click CZPopup to run it. If it doesn't run, try a different agent.
4. You can make agent run automatically when Mac machine starts up:

Option 1:

Step 1: Find the CZPopup application icon and click on it.

Step 2: Click on the File menu and select Make Alias. Drag the alias to the desktop where you can get at it.

Step 3: Double-click to open the System Folder and locate the Startup Items folder.

Step 4: Drop the alias into the Startup Items folder. The next time you start up your Mac, the application will launch.

Option 2:

Go into the system preferences - accounts - login items, you can adjust what programs load and don't load at sign in.
