From all at DataHouseSoftware
Thanks for using DataHouse - we hope it will serve you and your business well.

Use of This Software is strictly subject to acceptance of the following conditions.

LIMITATION OF LIABILITY. To the maximum extent permitted by applicable law, in no event shall DataHouseSoftware or its suppliers be liable for any special, incidental, indirect, or consequential damages whatsoever (including, without limitation, damages for loss of business profits, business interruption, loss of business information, or any other pecuniary loss) arising out of the use of or inability to use this software or the provision of or failure to provide Support Services, even if DataHouseSoftware has been advised of the possibility of such damages.

The Evaluation mode of DataHouse is limited to 200 contacts.
If you exceed 200 contacts you will be unable to access your data.

DataHouse can licensed by annual subscription or purchased outright.
See <http://www.datahousesoftware.com/datahouse/register.htm>

Installation and Setup

For a New Site, without DataHouse already installed

1. UNZIP THE ZIP ARCHIVE TO A TEMPORARY FOLDER

2. INSTALL THE APPLICATION

2.1. Open the folder from above, and double-click the setup.exe file. Follow the prompts, accept the licence conditions and **all default settings**.

3. OPEN THE APPLICATION

3.1. Open the shortcut to Pipeline on the desktop or start menu. This is a shortcut to the application on your hard drive. (The Application installs to the folder "C:\DataHouseSoftware\DataHouse")

3.1.1. The first screen prompts you to locate the database you wish to connect to. For testing and evaluation, leave all the details exactly as they are. Connect to the Access database installed to "C:\DataHouseSoftware\Data Files\DATAHOUSE TEST DATA.mdb"

3.2. For more information on working with Pipeline please refer to the manual

<http://www.datahousesoftware.com/downloads/DataHouseManual.pdf>

4. SETUP MULTI-USER ENVIRONMENT

4.1. If several users are to simultaneously access the same data, that data must be accessible to all users.

4.2. Using Access Back End Database

4.2.1. Quit Pipeline

4.2.2. Move the files "C:\DataHouseSoftware\Data Files\DATAHOUSE TEST DATA.mdb" and "C:\DataHouseSoftware\Data Files\DATAHOUSE LIVE DATA.mdb" to a folder that is accessible to all users who will use the database, ie a shared network folder or drive.

4.2.3. Re-open Pipeline and use the browse button to locate the data file in its new directory

5. ADD MORE USER ACCOUNTS TO THE DATABASE

5.1. Click on the button "My Company" in the toolbar

5.2. Enter the password "pivotal" without the quotes and click "Edit Company & Employees"

5.3. This screen shows your company name and data and is accessible by password only. The bottom half of the screen is where you list the consultants working for your company. Add users / employees by writing in new details in the first blank line at the bottom of the list of employees.

5.4. Add new users. The field username must match the username on the logon screen, similarly password on this consultants screen must match the password on the logon screen

6. REPEAT APPLICATION INSTALLATION ON EACH USERS COMPUTER

6.1. For installation on subsequent users PCs, repeat step 2.

7. FINISHED

7.1. You are now ready to use the database. Read the manual for further details
