

A little help for DP Hotkey BETA

You know the problem, you have many many icons on you desktop. You search every time for the correct program. This program manage this problem. First time run config.exe define all your program and save it. If you want insert a seperator open with an text editor:

line_insert.cfg write her the name before you want a seperator.

Data. Write here your important data sample your Bank or other information. Do not forget this password. **IT IS NOT** possible to recovery this pw.

Start program: Define your Shortcut to run this program, standard is CTRL+ALT+A

If you want start hotkey as startup run hotkey_in_startup.exe run again to remove it from the autostart.

Info about crypt.dll

If you want write a new Config.exe.

The deklaration from the DLL are the following:

function Encrypt(was,passwd:pchar):pchar;

for decrypt

function Decrypt(was,passwd:pchar):pchar;

Test it: Insert the following crypted text:

98KMtS3L1ZhoWsc9d8UbcGKJzs2

+vuP69C5nRscduPnRMmnndhB9HPq5mr8kz6tO5t3OoXC24XvL8aRWPdEknFNXXj

tgbx1arrrBN4rMszlQaOT0GSf919UjdpIc+

1lxSFty8jGMLxvmH8RkOGqU7OO3oE/O8XchiG4FxY8Ta51BRC2DBb7Ijx5CUqPu

Fs8O4Tyk7wKVHwj4ieWAZMEDTs2cbz5SiVaphrkao7WzElpxEyCYMuPbPBtd/1v6Y

fIMr/kLcXqffyNt2JpMPilFsluJ6g==

with the PW: test

and you must see the text at the top.

Sample for delphi:

function Encrypt(was,passwd:pchar):pchar;external 'CRYPT.DLL';

function Decrypt(was,passwd:pchar):pchar;external 'CRYPT.DLL';

encrypt:

var crypt:Pchar;

crypt:=Encrypt(pchar(Memo1.Text),pchar(edit2.Text));

now in crypt are the crypted text

decrypt:=Decrypt(pchar(Memo1.Text),pchar(edit2.Text));

**Now you can send me your result: <http://www.paehl.de> under contact
or via mail to dpaehl.support@mailnull.com**
