QUESTION: 1

Which NetWorker command can be used to find out the dates that a specific save set has been backed up?

- A. mminfo
- B. mmls
- C. nsrinfo
- D. nsrls

Answer: A

QUESTION: 2

You are designing a backup schedule for a file system that changes frequently.

Which NetWorker weekly backup schedule results in the fastest recovery?

- A. Full incr incr incr incr incr incr
- B. Full 1 2 3 4 5 6
- C. Full 4 7 4 7 4 7
- D. Full 8 8 8 8 8 8

Answer: D

QUESTION: 3

Which NetWorker server daemon is responsible for starting other server and storage node daemons?

- A. nsrd
- B. nsrjobd
- C. nsrmmbd
- D. nsrmmgd

Answer: A

QUESTION: 4

You want to make sure that only NetWorker Server S1 can back up client C1's data.

What do you need to do?

- A. Add C1 to /nsr/res file on the NetWorker Server S1
- B. Add C1 to /nsr/res/clients file on the NetWorker Server S1
- C. Add S1 to /nsr/res/permissions on the client machine C1
- D. Add S1 to /nsr/res/servers file on the client machine C1

Answer: D

QUESTION: 5

You noticed that a full level save set is still browsable even after its browse time has expired.

E20-593 Practice Exam Questions Demo

What could be the cause?

- A. A clone of the save set exists and has a longer retention period
- B. Incremental save sets depending upon this full save set are still browsable
- C. The volume containing the save set is still browsable
- D. There was a read error on the volume containing the save set, giving it a "suspect" status

Answer: B

QUESTION: 6

The status of a volume was prematurely set to full.

Which command can be used to change the status of the volume to continue writing to it?

- A. jbedit
- B. mminfo
- C. nsrck
- D. nsrmm

Answer: D

QUESTION: 7

You are designing a solution for a customer using NetWorker and PowerSnap, to create and back up copy on write (CoW) snapshots of a STD device on a DMX-3 accessed from a Solaris 9 application host. The STD volume size is 300 GB with a change rate of 10%.

What is the minimum VDEV (Virtual Device) size needed?

- A. 30 GB
- B. 270 GB
- C. 300 GB
- D. 330 GB

Answer: C

QUESTION: 8

Which NetWorker Management Console server daemon acts as a mini web server and responds to the initial http request from console clients?

- A. dbsrv9
- B. gstd
- C. gstdclsh
- D. nsrd

Answer: C

QUESTION: 9

Which NetWorker feature allows writing more than one save set at a time?

- A. Advanced file type device
- B. Multiplexing
- C. Open tape format
- D. Remote backup device

Answer: B

QUESTION: 10

A customer wants to back up two NetWorker clients at the same time every day.

Which NetWorker resource is configured to include both clients?

- A. Group
- B. Policy
- C. Pool
- D. Schedule

Answer: A

QUESTION: 11

Which NetWorker process initiates negotiation with nsrd during a client-initiated backup?

- A. nsrexecd
- B. nsrindexd
- C. nsrlcpd
- D. nsrmmdbd

Answer: A

QUESTION: 12

Which NetWorker daemon is responsible for the communication between nsrjb and the user interface?

- A. nsrd
- B. nsrexecd
- C. nsrlcpd
- D. nsrmmgd

Answer: D

QUESTION: 13

Which NetWorker process runs on each storage node?

- A. nsrd
- B. nsrexecd

E20-593 Practice Exam Questions Demo

- C. nsrjobd
- D. nsrmmd

Answer: D

QUESTION: 14

What manages a NetWorker remote device?

- A. A host outside the NetWorker data zone
- B. A storage node other than the NetWorker server
- C. Another NetWorker server
- D. Remote administration tools

Answer: B

QUESTION: 15

In an EDL environment, what describes the use of Tape Cloning with the embedded storage node once the data has been backed up to virtual tape?

- A. Backup application issues clone command; EDL copies save sets to physical tape with different barcode
- B. Backup application issues clone command; EDL copies save sets to physical tape with same barcode
- C. Backup application issues eject command; EDL moves backup data to physical tape with different barcode
- D. Backup application issues eject command; EDL moves backup data to physical tape with same barcode

Answer: A

QUESTION: 16

A company wants to use a CX3-80 with FLARE 24 as a backup-to-disk destination device. ATA disks are being included as part of the solution.

Which RAID type should be used?

- A. RAID 0
- B. RAID 3
- C. RAID 5
- D. RAID 1/0

Answer: C

QUESTION: 17

You are configuring two LUNs with 1.5 TB each in a CLARiiON CX3-80. They will be used as backup-to-disk destination devices on a single Windows NetWorker server.

Which license (option) is needed?

- A. ClientPak
- B. Disk Backup
