

Restore Point Creator

Installation Instructions

Restore Point Creator is a free tool which creates standard windows restore points on your computer. You use the built-in Windows Task Scheduler to schedule how often you want to create restore points Daily, Weekly, Monthly. Restore point creator, once setup runs in the background at the scheduled time and creates a restore point. You never have to worry again or worry if you need to restore back to a previous time.

File Installation

1. Create a folder on a drive e.g. C:\Tools in that folder put the RestorePointCreator.exe
2. Now Follow the instructions below to make daily/weekly restore points

Setup Restore Point Creator to Run Daily/Weekly/Monthly

- A. All Programs > Accessories > System Tools > Task Scheduler
- B. Click on the left hand side Task Scheduler Library
- C. Right Click on the **Task Scheduler Library**
- D. Click on **Create Basic Task**
- E. In the Name Box type in: Restore Point Creator
- F. Click Next
- G. Select One Option: Daily/Weekly/Monthly
- H. Click Next
- I. Set it to a certain time your computer will be on. I set mine for 9:00am because I am always on at that time.
- J. Click Next
- K. Select **Start a program**
- L. Browse to the Restore Point Creator.exe file e.g. C:\Tools\Restorepointcreator.exe
- M. Click Next
- N. Click the check box "Open the properties dialog for this task when I click finish"
- O. Click Finish
- P. A new window will open
- Q. Click Run whether user is logged on or not
- R. Click do not store password
- S. Click Run with highest privileges
- T. Click Hidden
- U. Select Windows 7, Windows 2008 in the Configure For list
- V. Click OK

That's it! A restore point will be created each Day/Week/Month if you ever need to use it then just use the standard windows System Restore to restore your computer.
