1. GET STARTED

1.1. Installing the system

Describe the procedures that the user must perform so they can access/install software, configure software, delete data, and setup software operations.

When you buy the program you will receive a download link that will point to a file with the name eBayAuctionScraperDemo.zip.

Please download this file to a folder in your PC and then unzip it using WinZip, WinRar or other similar tool.

We will show you how to unzip using WinRar, but the process will be very similar for the other tools.

Please follow these steps to unzip your installer:

- Press Extract to for unzip this application.

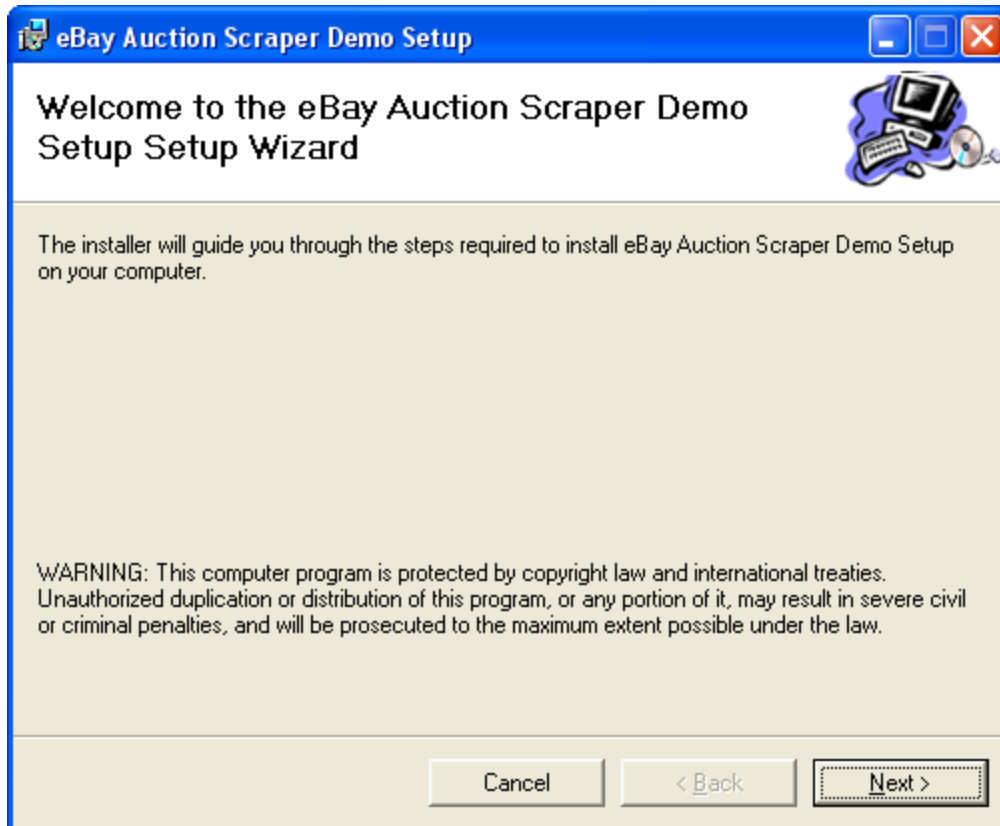

- Choose the folder where do you want to have the application unzip and press OK.
- Search a file with the name eBay Auction Scraper – Demo.msi in the folder that you choose. This will be the main installer. Keep copy of this file just in case you need to reinstall the software in the future.

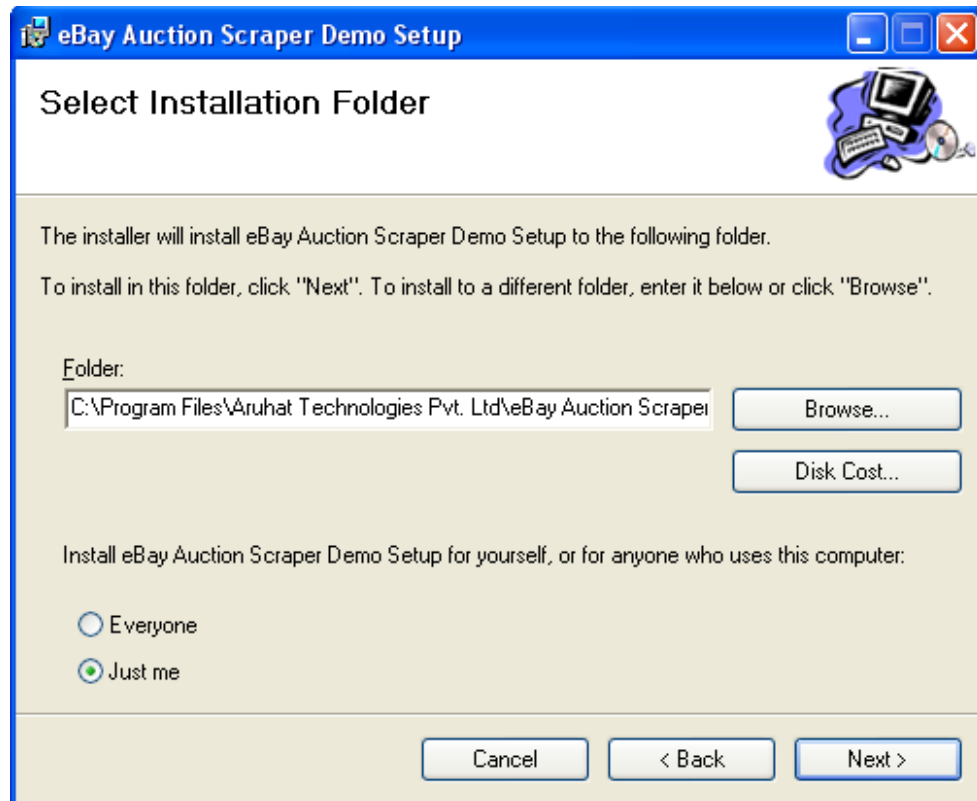

- Do a double click over this file and a main window will appear to install the program. Click Next to continue.

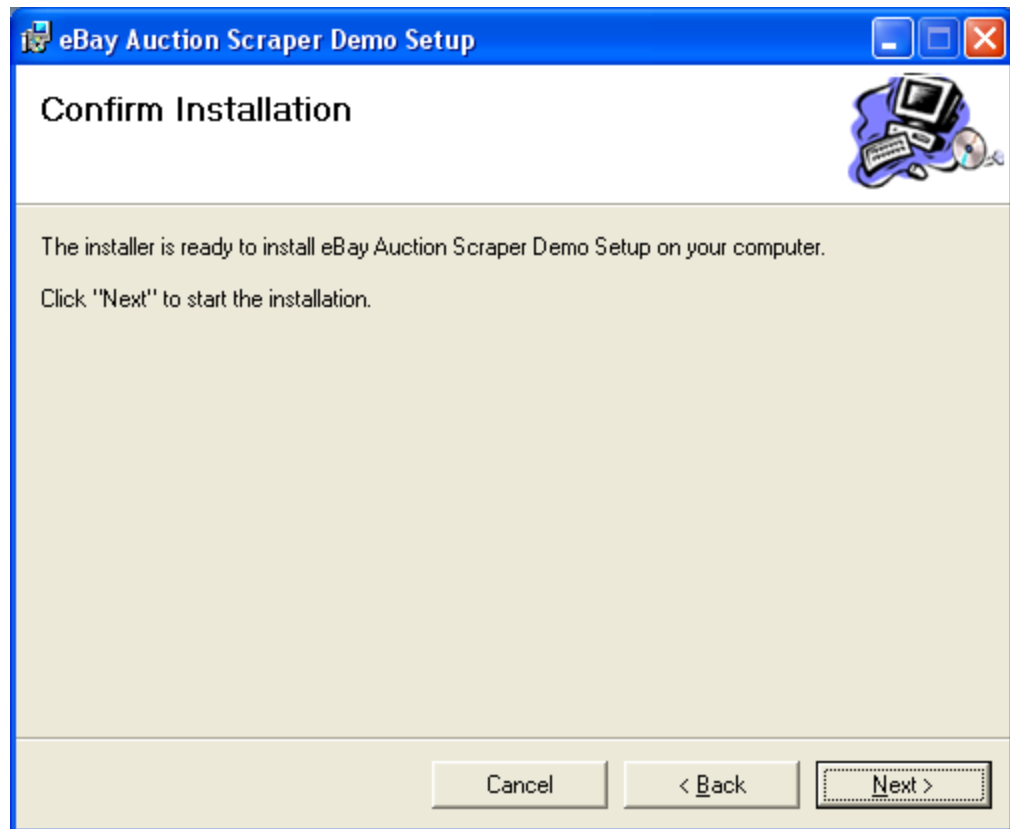

- Select Browse to choose the folder where do you want to install the tool and press Next to continue. We recommend let this setting with the default path.

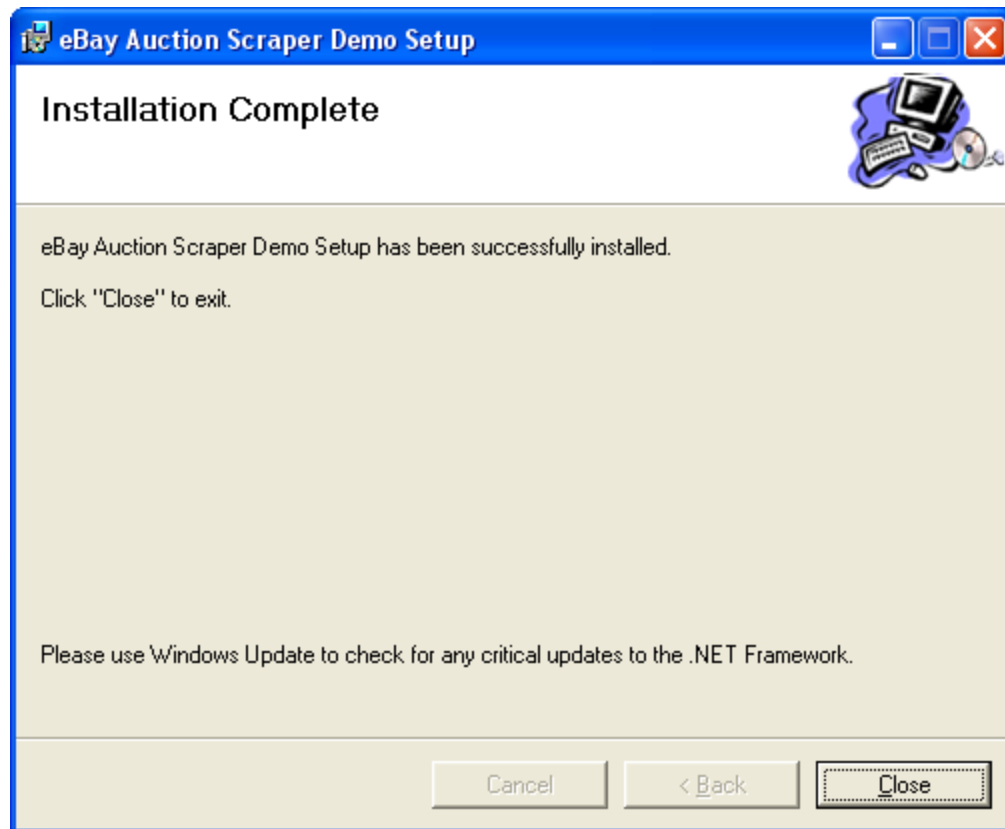

- Click Next to continue.

- Press Close to complete the installation.
