

eDiceDE

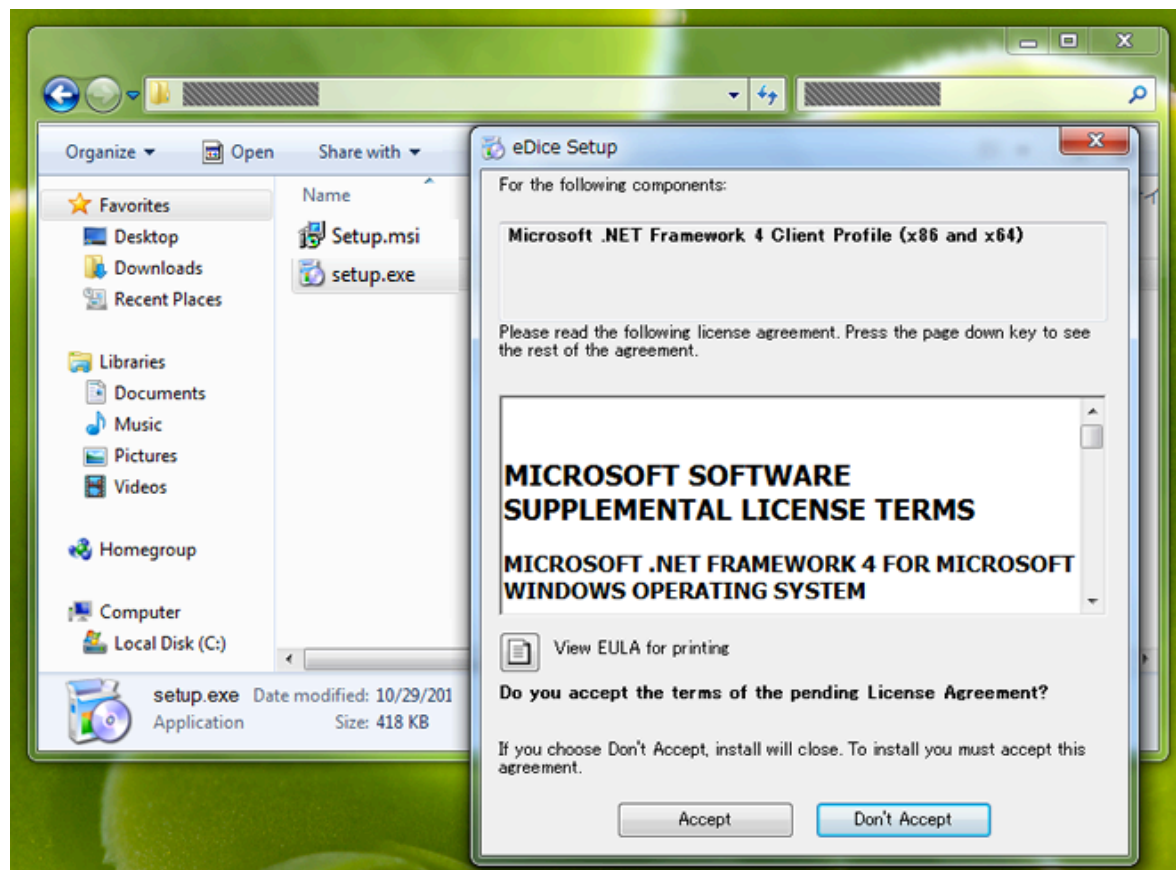

Thank you for your using eDiceDE.

1. Introduction

eDiceDE is a special version of eDice that is designed exclusively for software developers. It allows the user to easily generate a number of unique, random activation keys in the form of their choice. You can generate as many as 100,000 unique activation keys and save a list as a text file, which you can of course open with Microsoft Excel.

2. Installing eDiceDE

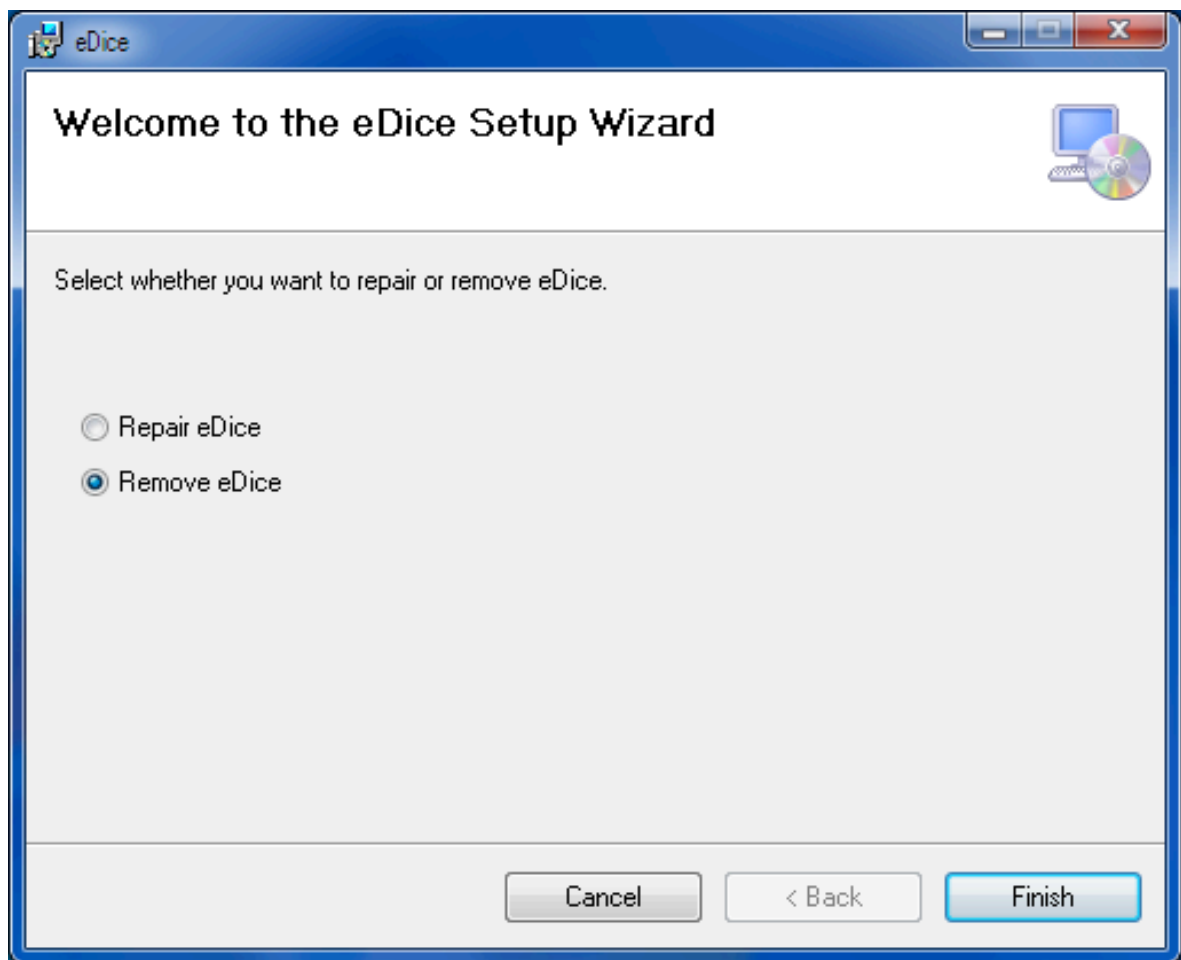

Double-click on **setup.exe** in the delivery package initiate the installation process. If your computer doesn't have it yet, eDiceDE will first attempt to install **.NET Framework 4**, and you will be prompted for confirmation. (See Screenshot 2.) Then you will proceed to install eDiceDE. You can use **Setup.msi** to install the application as long as you already have .NET Framework 4, which eDiceDE requires. You can find the application at the following path: C:\Program Files\MacHouse\eDiceDE.

3. Uninstalling eDiceDE

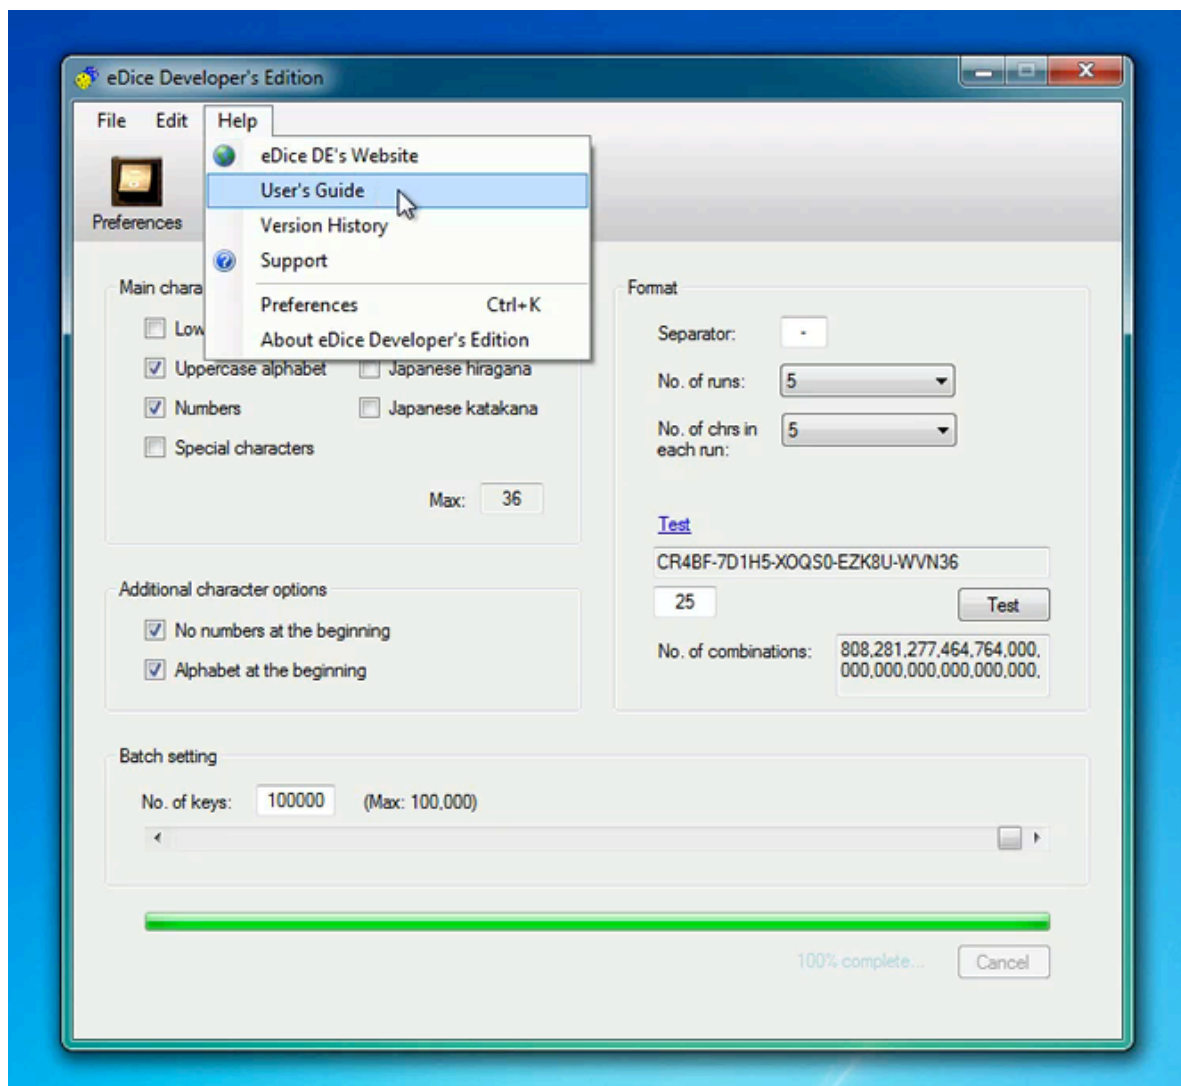

Open Control Panel and choose Uninstall a program. Then double-click on eDiceDE to initiate the uninstalling process. (See Screenshot 3.) You can also use the original setup.exe or setup.msi to uninstall the application. (See Screenshot 4.) Additionally, when it starts up for the first time, the application will create a folder, which you need to manually trash. You can locate it easily by opening Preferences and navigate to the System tab.
