

EG FOLDER LOCK

1.) What is EG FOLDER LOCK?

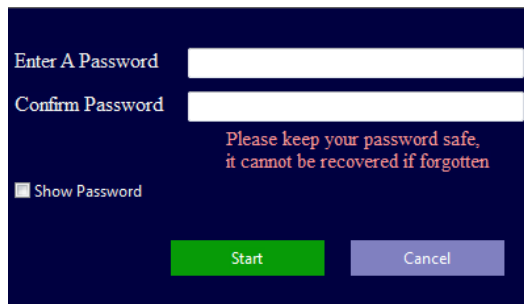

This is an easy, simple, user friendly, fast and absolutely free software used to lock your important, sensitive folder (A folder contains folders, files, documents, images, videos etc.) on your computer. The folder is password protected and cannot be copied, accessed, renamed and deleted without the correct password. Also the software cannot be uninstalled without the correct password.

The Locked Folder cannot be accessed from shortcuts, recent documents files/folders, command prompt, changing drive letter, safe mode, booting from another computer via virtual box or other means.

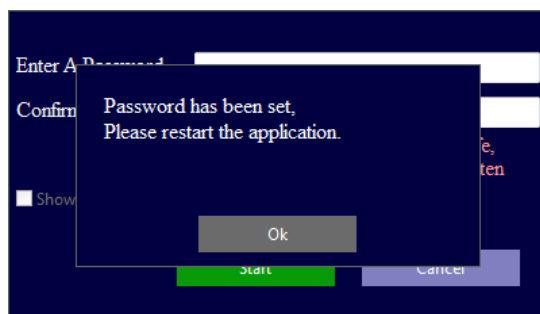

Currently, this software is available only for windows operating system (e.g. Windows XP, Windows7, Windows8, and Windows10).

2.) How to install EG FOLDER LOCK?

Download the setup file from our website "<http://www.egsoftweb.in>" and install it on your computer. After the installation, a dialog window will open like below:

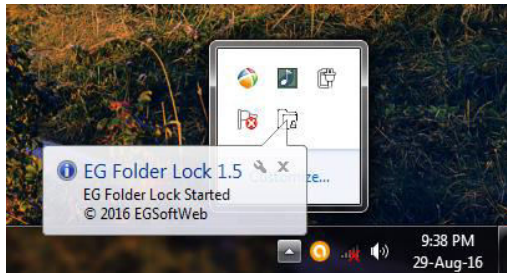

Set a strong password (a strong password contains at least two lowercase alphabet, two UPPERCASE alphabet, two digits and two other symbol like *, @, #, \$, %, ^, & etc.) and click on button Start. After clicked on Start, your password will set and you will see like this:

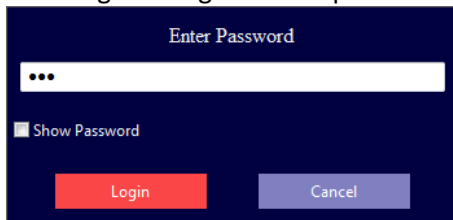

Then Click Ok button and restart the software from its shortcut on your computer desktop screen.

You will see a notification on the taskbar. Now double click on the EG FOLDER LOCK icon from this taskbar menu.

Then login dialog box will open:

3.) How to use EG FOLDER LOCK?

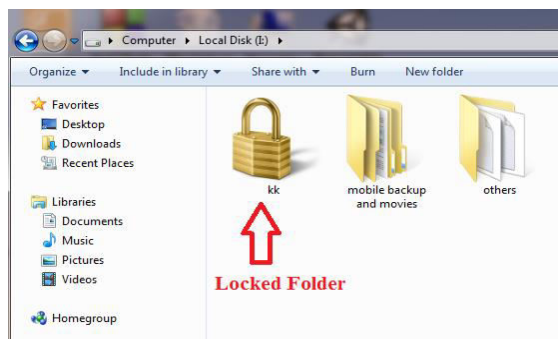

Enter your password and click on Login button. The main dialog window will open:

Now put your all important Data (eg. Files/Folders, images, videos etc.) on a folder and then select the folder by clicking the Select Folder button. And Finally press the red button "Lock".

Now you have to logout from this main screen. Please, do not forget to logout. So click on Logout button and make safe your folder from being copy, access, delete and rename.

To unlock your folder, login from the taskbar icon and press the green button Unlock. Your folder will be unlocked. If you are not going to lock any folder you may Logout or Exit from the software by pressing Exit button.

If you want to lock a folder again then you can run the software again from the shortcut on your computer desktop screen.

NOTE:

- If you forget your password we will not be able to help you in any situation. So please keep your password safe.
- Please read the full license page and must agree with it. If you do not agree with the license, stop using this software.

4.) Recommendation

It is best if your important data is encrypted before you are going to lock them. If you want to protect data of big size (e.g. greater than 5GB) like a folder contain only movies and videos you do not need to encrypt them. But if your folder contains important documents, images, other documented type files then you must use encryption and we provide it free.

So before using “EG FOLDER LOCK”, we strongly recommend you to use “EG FILE ENCRYPTION” to encrypt your most important, sensitive documents, images etc. This is also a free like “EG FOLDER LOCK”. You can visit our website “<http://www.egsoftweb.in>” to get this software.

5.) Wish list

If you like our software or think that it may be useful or want to suggest something about it then you can give your feedback on our website <http://www.egsoftweb.in>. We will always welcome your comments and surely notice your suggestions.

6.) Report a bug

If you find a bug or an error then you can message us or send email on our website <http://www.egsoftweb.in>. It will be your great contribution to make the software better.

Thank you for reading this document.
