Sound module. Installation and usage

Dear Valuable Customer!

Thank you for using our software.

It is your interest that inspires us to develop innovative solutions for mobile devices.

Sound module. Installation and usage

Many dictionary databases used with "**MultiLex**" dictionary engine have always provided phonetic transcription for the words. Now you can look at the translation and the transcription of a word, but also you can listen to it and improve your pronunciation (the words are spoken by professional native speakers).

With a dictionary you can use a Sound module, which contains the pronunciation of the words from the dictionary wordlist. Sound modules available for a specific language vary from maximally full versions to compact versions that contain only pronunciation of the most frequently used words.

For the information about "**MultiLex**" dictionaries for Palm OS and available sound modules, please visit our site: <http://palm-dictionaries.penreader.com/>.

Sound Module. Demo-version limitations and registration.

The more you use an unregistered sound module, the more often you hear a beep instead of the pronunciation. You receive the registration code for your dictionary after purchasing the sound module (the information on how to obtain your registration code is available in the section: "Ошибка! Источник ссылки не найден."). To register the Sound Module open the **Options** section of the menu, select **Register dictionary** and enter the registration code for the Sound Module.

Sound module. Installation

ATTENTION!

- Sound Module may not function correctly in case it is installed into the main memory of your device (it depends on individual features of some devices). Due to this fact, we do recommend to install Sound Modules on expansion cards.
- Sound Modules will function only with the latest version of the dictionary engine – "MultiLex 2005". It will not work with earlier versions of the dictionary engine.

To install the Sound Module, you should do the following:

1. Make sure that "**MultiLex**" 2005 is installed on your device. The Sound Module will not function with an earlier version of the dictionary engine. The installation of the "**MultiLex**" dictionary engine is described in the section "Ошибка! Источник ссылки не найден."
2. Double-click on each of the *.prc file, or launch **Palm Desktop** and select the **Quick Install** item in the **Palm Desktop** window.
3. The **Palm Quick Install** window will appear. If you want to install the Sound Module into the main memory of your device (not recommendable), drag-and-drop the dictionary files to the **Handheld**

field. If you want to install the Sound Module on an extension card, drag-and-drop the file to the **Expansion Card** window. You can also use the **Add** button to browse for the necessary file.

NOTE

The illustrations show the interface of Palm Desktop 4.1 and Quick Install 1.0

4. Synchronize your mobile device with your desktop computer using the HotSync program. To perform this operation you should connect the mobile device to the desktop computer, open HotSync on the mobile device and tap the icon in the centre of the screen.

Sound module. How to use it

After you install the sound module, the Sound icon  will appear near some words if their pronunciation is present in the sound module (it will be shown in the wordlist in the title of the dictionary entry, and in the Resident).

Sound in the main window

To listen to the word tap the sound icon  in the wordlist or the toolbar sound icon . Besides, you can use the **Sound** menu item in the **Dictionary** menu section.

Sound in the dictionary entry

To listen to the pronunciation in the full-screen mode, tap the sound icon  near the title of the entry.

Sound in the Resident

To listen to the pronunciation in the Resident mode, tap the sound icon  near the title of the entry. If you are viewing the wordlist in the Resident window, tap the sound icon  in the wordlist.

Sound Module. Uninstallation.

The Sound Module can be uninstalled with uninstallation of the dictionary. To uninstall the dictionary engine perform the following steps:

1. Deactivate the Resident module: open the menu of the dictionary and select **Options > Resident > Kind of resident activation**. Then uncheckmark all the activation methods. You can also restart your device 2 times to deactivate the Resident.
2. Tap the Home icon on the Graffiti area to open the applications window.
3. Open the menu and select **App > Delete**. Select "MultiLex" in the list of applications and tap **Delete**.

To delete the dictionary databases, select them in the list (the name can look like English_Russian.prc) and tap **Delete**.

Dear customers!
Your reports and comments are highly appreciated.
They help us to improve our programs quality.
Thank you in advance for your reports.
