

Read First – FileFire Advanced

Thanks for evaluating FileFire Advanced – the advanced version of the indispensable and easy-to-use file management plug-in for FileMaker.

Installation Instructions

Be sure to read the license agreement enclosed with this package before you start using the plug-in since you agree to the terms of the license agreement as soon as you start using the software.

To install the correct plug-in version of FileFire Advanced, open the folder 'Plug-In' and choose the plug-in file from the correct sub-folders according to your operating system.

Close FileMaker before installing the plug-in.

FileFire Advanced comes in two versions:

- FileFire Advanced for Windows and FileMaker 7-10
- FileFire Advanced for Macintosh and FileMaker 7-10

Copy the plug-in into the *Extensions* folder that is located in the FileMaker application folder. You may need to extract the plug-in from the archive file prior to installing it.

After installing FileFire Advanced explore its functionality using the *QuickStart* file that is part of the download package. Please have a look at the manual for a complete list of functions and more details.

Registration Information

FileFire Advanced is commercial shareware. You are allowed to try this FileMaker plug-in for 14 days. After that the plug-in cannot be used any longer without registration. To remove this restriction, please purchase a FileFire Advanced license at:
