

Thank you for using Formula-In-One Version 5.0

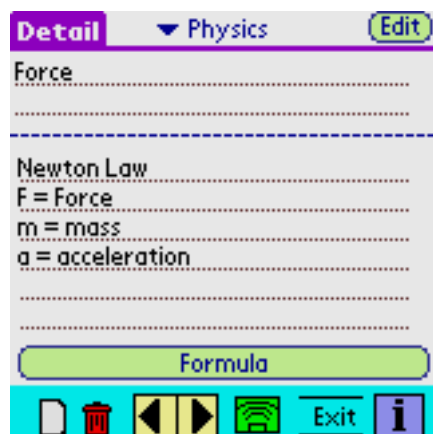

How to use this program:

pls install the prc file into your palm.

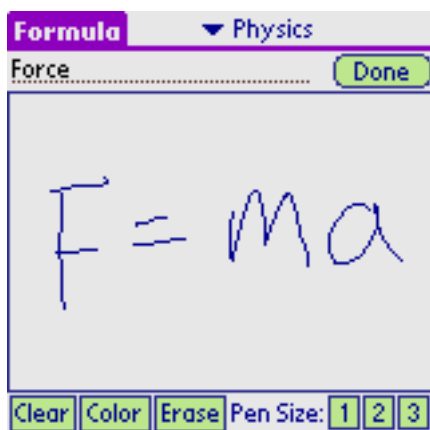

1. Fisrt, once you lauch the program, you will see the picture below:

2. Let say you need to add one formula call "Force", tap on the "New" button, you will see the screen below:

3. Now, select the category of "Physics", then key in the title and the description as above, once finish, you can sketch the formula by tapping on the "Formula" button: (See below):

You can use different pen color, different pen size and eraser by simply tap on the toolbar at the bottom then draw/sketch it on the formula page.

4. Tap on the "Exit" button once finished, you will see the formula title under the formula list. You can also select the Category of "Physics" by just viewing all Chemistry Formula.

5. If you need to create new Category, just tap on the "New Category", then "New" button, you can add as many categories as you want.
