

## Hatchery Assist

### Creating Fish Movements

#### Step 1 Creating a Fish Movement Record

The screenshot shows a software window titled 'Fish Movements'. It contains several input fields and buttons. At the top, there are dropdown menus for 'Move Date' (showing 21/02/2005) and 'Move Time' (showing 09:03). Below these are fields for 'From Fish Id' and 'From Tank Id', each followed by a question mark button. To the right of these are 'Fish Count' and 'Tank Size (m)' fields, both showing '0'. Further down are 'To Fish Id' and 'To Tank Id' fields, also with question mark buttons, followed by another set of 'Fish Count' and 'Tank Size (m)' fields, all showing '0'. There is a 'No of Fish Moved' field, a 'Reason For Move' text area with a '>>' button, a 'Person Responsible' field with a question mark button, a 'Comment' text area with a '>>' button, and a 'Tag Id' field with a question mark button. At the bottom left are navigation buttons: 'K', '<', '>', and '>|'. At the bottom right are action buttons: 'Save', 'Find', 'Delete', 'Reset', 'Print', 'Refresh', 'Cancel', 'Help', and 'Import'.

#### **Move Date**

This field captures the date of the fish movement

#### **Move Time**

This field captures the time of the fish movements and can allow you make many movement records for the same fish id and same day but at different times.

#### **From Fish Id and From Tank Id**

These fields are both selected from the Fish to Tank Assignment Screen via clicking on the ? mark button next to the From fish Id. You only have to enter the Tank Id and then click on the ? mark button to find the record.

#### **To Fish Id and To Tank Id**

These fields are both selected from the Fish to Tank Assignment Screen via clicking on the ? mark button next to the To fish Id. You only have to enter the Tank Id and then click on the ? mark button to find the record.

#### **No of Fish Moved**

This represents is the number of fish to transferred.

#### **Person Responsible**

Is the person who is performing the job.

#### Using the Fish Movement Wizard

There is also a fish Movement Wizard that can assist you with data entry . The Wizard can move fish from a single source tank to up to 5 destination tanks at the same time. It can also create a Tank Weight check record and also a Tank Count Adjustment record.

The screenshot shows a Windows-style dialog box titled "Fish Movements Data Wizard". It contains the following fields and controls:

- Select Source Tank:** A dropdown menu.
- Select Destination Tanks:** Five stacked dropdown menus.
- Enter Fish Moved:** Five stacked text input fields.
- End Avg Weight (gm):** Five stacked text input fields.
- Enter Date of Transfer:** A date picker showing "15/11/2005".
- Start Time:** A time picker showing "02:33 PM".
- Enter Staff Member:** A dropdown menu.
- Buttons:** "Process", "About", and "Cancel" at the bottom.
