Study Tips

This product will provide you with questions and answers carefully compiled and written by our Expert Senior Certified Staff. Our practice questions are designed to help you learn the concepts behind the questions rather than be a strict memorization tool.

Important Note:

Please Read Carefully

Repeated readings of our Pass-Guaranteed.com Practice Exam will increase your comprehension. We constantly add to and update our Practice Exams with new questions, answers and explanations, so check that you have the latest version of this Practice Exam before you take your exam.

For security purposes, each PDF file is encrypted with a unique serial number associated With your Pass-Guaranteed.com account information. In accordance with International Copyright Law, Pass-Guaranteed.com reserves the right to take legal action against you should we find copies of this PDF file distributed to other parties.

Update Notifications (Latest Version)

We are constantly reviewing our products. New material is added and old material is revised. Free Updates are available for 180 days after purchase. If you purchased a bundle, you will have Free Updates for 1 YEAR!

You can signup to our newsletter for instant notification whenever an update is released by becoming a Pass-Guaranteed.com member at: <http://www.pass-guaranteed.com/log.htm>

By becoming a Pass-Guaranteed.com member, you also get a chance to win a FREE Practice Exam of your choosing. We give away 3 Pass-Guaranteed.com Practice Exams every week to 3 lucky winners.

Pass-Guaranteed.com Product Specials

Pass-Guaranteed.com Custom Bundle Requests, cover all Pass-Guaranteed.com Products!!! You can visit our Special Bundle Discounts from Pass-Guaranteed.com or make your own Custom Bundle Request with Pass-Guaranteed.com here: <http://www.pass-guaranteed.com/bundles.htm>

Pass-Guaranteed.com Custom Bundle Request Form let's you create your own Bundle Of Products!!! You can select and group any of our products for your Custom Bundle and we will give you up to a **50% Discount** on your Custom Bundle Package. This includes our [Practice Test Questions](#), [Online Course Tutorials](#), [Study Guides](#), [Lab Scenarios](#) and our [Certified Online Instructor](#) service.

Please visit: <http://www.pass-guaranteed.com/custom-request.htm> If you would like to purchase a Custom Bundle from Pass-Guaranteed.com.

HP0-648 Demo – Pass-Guaranteed.com

QUESTION: 1

The network administrator at Pass.com site reports that HP ProCurve Manager Plus has not discovery any manageable devices except those on the subnet where the PCM Management Server resides.

How do you explain this?

- A. This behavior is normal because PCM discovery messages do not cross router interfaces. The administrator should install PCM on a station in each subnet, then use the PCM Preferences Window to link the PCM Management Servers.
- B. This behavior is normal because PCM automatically discovers only those devices residing on the same subnet as the configured default gateway. The administrator can use the Preferences Window to add other Managed Subnets.
- C. The behavior indicates that PCM has been configured with an incorrect default gateway. The administrator should correct the gateway configuration, then manually initiated a new discovery.
- D. This behavior is normal because PCM discovery uses Cisco Discovery Protocol (CDP), which only survives one switch-to-switch hop. The administrator should use HP Open View to discovery and manage devices on multiple subnets.

Answer: B

QUESTION: 2

The network administrator at Pass.com site asks you to describe the differences between HP ProCurve Manager Plus and HP ProCurve manager Plus and HP ProCurve Manage.

Which statements describe feature that you are included only in HP ProCurve Manager Plus? (Select TWO).

- A. an interface for defining configurations that can be applied to multiple devices simultaneously
- B. an interface for configuration pager alerts when the application detects unauthorized attempts to access device management features
- C. an interface for tracking and logging configuration changes
- D. an interfaces for determining what types of devices are connected to each port on discovered switches
- E. maps of VLANs and physical network topology

Answer: A.C

QUESTION: 3

You will be installing HP ProCurve switches at Pass.com site that includes switches that do not support HP Port Trunking. However, the existing switches do support Cisco Fast EtherChannel.

HP0-648 Demo – 100% Money Back Guaranteed!!!

What configuration setups are necessary to enable link aggregation between the existing switches and the ProCurve switches?

- A. Upgrade the firmware on the HP ProCurve switches to enable support for FEC.
- B. No special configuration is necessary because the Pro Curve switches automatically will recognize switches' FEC configuration.
- C. Configure the HP ProCurve switches for static FEC and the existing switches for dynamic FEC.
- D. Configure all switches for Link Aggregation Control Protocol (LACP) because FEC and HP Port Trunking are not compatible.

Answer: C

QUESTION: 4

A network administrator at Pass.com site asks about the impact of classifying some high-priority traffic for an 802.1p value of 7 and other traffic for an 802.1p value of 6.

What will the effect of this configuration be? The change in 802.1p value _____.

- A. is not possible because the 802.1p field does not support a value of 7
- B. will introduce network latency by marking forwarding more complicated
- C. will provide more granular control over forwarding priority
- D. will make no difference in actual forwarding because both priorities are placed in the same physical queue on switches before forwarding

Answer: D

Explanation:

Incorrect Answers:

- A. 802.1p supports 0-7 (3 bits)
- B. Just not true
- C. Will not provide more granular control since 6 and 7 map to the same queue.

Check out the diagram in the QOS module that shows the mapping of the priorities to the queues. The mappings of priorities to queues is as follows:

Q4 - 6,7
Q3 - 5,4
Q2 - 3,0
Q1 - 2,1

Within a queue, the priority is irrelevant...FIFO. So 6 & 7 are treated the same. Note that some switches have 2 queues (2500 and 4000) or 3 queues (4100). All other switches have 4 queues.

QUESTION: 5

You are installing a new HP ProCurve switch at Pass.com site.

Which statements describe for configuring the switch's IP addressing information? (Select TWO).

- A. Connect to the switch using the serial console interface, enter the global configuration level, enable DHCP, and assign an address scope.
- B. Connect to the switch using the serial console interface, enter the global configuration level, and assign a box-wide IP address and mask.
- C. Connect to the switch using the serial console interface, enter the global configuration level, and assign an IP address and mask within the VLAN 1 context configuration level.
- D. Leave the switch at its default settings and allow it to acquire a reserved IP address, mask, and default gateway from a DHCP server
- E. Connect to the switch using the Telnet interface, enter the global configuration level, and assign a box-wide address.

Answer: C.D
