QUESTION: 1

What must be done to configure HP Data Protector Software online integration for an Oracle Data Guard standby system?

- A. You must locally reconfigure the standby system.
- B. Configuration must be done on the Cell Manager system only.
- C. The configuration must be distributed manually to all three servers.
- D. The standby and the primary system must be configured individually.

Answer: B

QUESTION: 2

David uses a Virtual Library System (VLS) for backing up his Oracle archive logs and file server data. He uses a capacity based license for one terabyte. This limit is exceeded during backup.

What does HP Data Protector Software do?

- A. generates a minor error and reports it
- B. generates a major error and backup stops immediately
- C. generates a critical error and notifies the HP license team
- D. generates a minor error and the next backup job will not run

Answer: A

QUESTION: 3

Which conditions must be met when you duplicate a database with the HP Data Protector Software Oracle integration? (Select TWO.)

- A. Net service name for the auxiliary instance must be configured.
- B. The entire primary database, together with the archived log files, must be backed up.
- C. Duplicating a database on the same system that the target database resides is not supported.
- D. Archive logs that have not been backed up to tape since the last full backup, are not required for duplication.
- E. To prepare for database duplication, you must first create an auxiliary instance and start it in Mount mode.

Answer: A, B

QUESTION: 4

What are functions of the omnisap.exe program in SAP R/3 integrations with HP Data Protector Software? (Select TWO.)

- A. starts the SAP R/3 backup utilities
