

Upgrades/Install:

If you are updating please copy the contents of this zip file to the HS Code Inventory program folder on your computer.

As of version 1.0.3 ColorCode.dll is not used any more, you can delete this file from your computer.

This program uses an Access database to store your code so you can search it. If you don't have the 2007 Office System Driver: Data Connectivity Components installed you will get a Microsoft.ACE.OLEDB.12.0 driver error. You can download this from Microsoft's web site. [Click Here](#)
