Installing Server

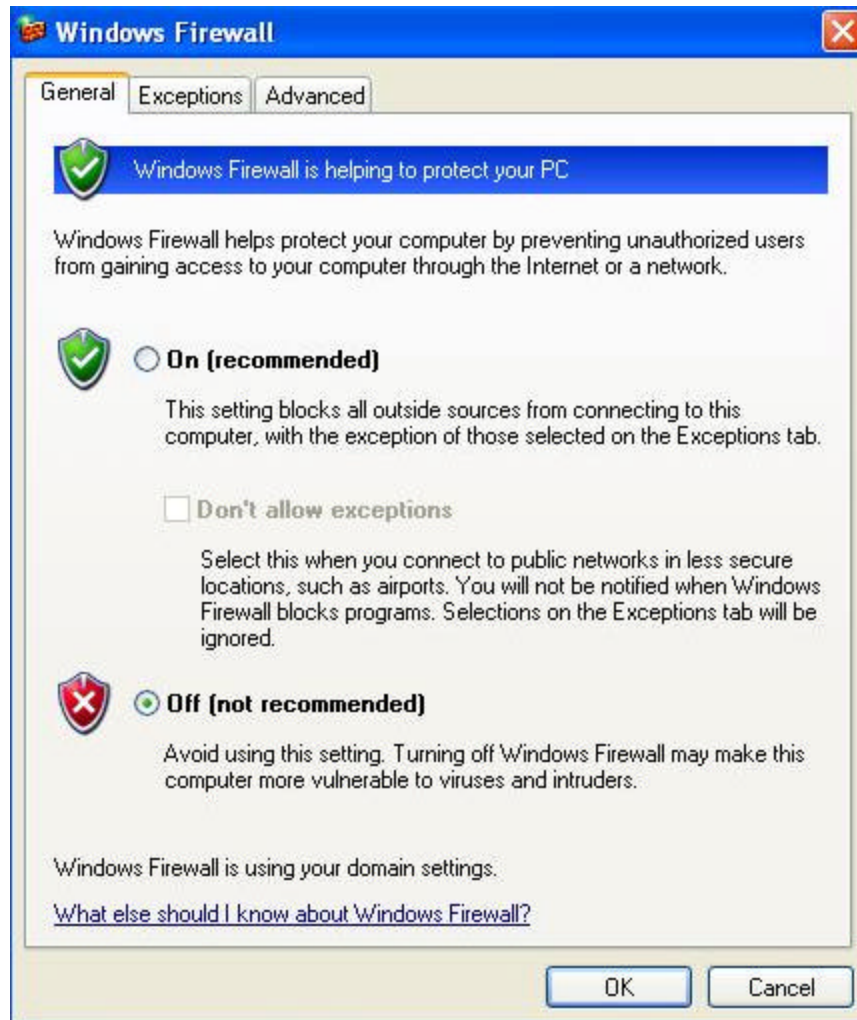

- Install the server setup.
- Run icafeSERVER.exe file
- Put the user name and password
- Click login

If your windows firewall is (on) please make it (off) or **add ICafe server to the exceptions.**

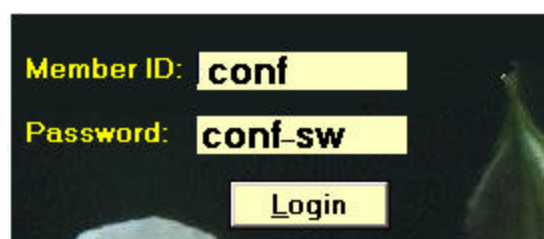

You can access you firewall by going to Control Panel > Windows Firewall

(Please see picture below)

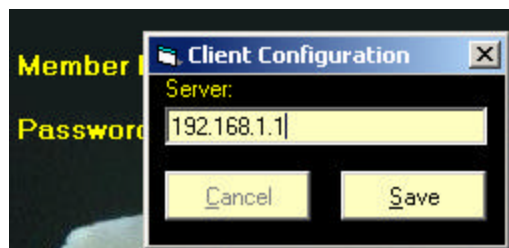

Installing Client:

- Install the client setup in all clients' PCs.
- Run system.exe file
- Put the user name and password for configuration mode

- Enter the server name or IP address.
- Save the configuration.

Server Administration

Then the server will List all configured clients as in the picture below.

Users

I Café implement user management each user has different authority in system.

Switch User

If the current user has finished his working time and the following time shift user came, then the current user can switch user. The authorized user can login the system again.

Manage Users

The administrator can add, delete, update users, and if necessary block users.

The 'Users' window displays a table with the following data:

ID	Name	Phone
odeh4	abdoooooo	0795166416

Below the table, there are form fields and buttons:

- ID: ☐ Blocked
- Password:
- Name:
- Phone:

Change Password

The current user can change his password to a new one.

The 'Change Password For [ADMIN]' window contains the following fields and buttons:

Passwords

- Password:
- New Password:
- Confirm :

Client Password

The user can change his client password.

A screenshot of a Windows-style dialog box titled "Change Password For [ADMIN]". The dialog has a blue title bar. Inside, there is a section titled "Passwords" in yellow text. Below this title, there are three labels with corresponding text input fields: "Password:", "New Password:", and "Confirm :". Each label is in yellow text, and each input field is a white rectangle. At the bottom of the dialog, there are two buttons: "Cancel" and "Ok", both with yellow backgrounds and black text. The "Ok" button has a small underline under the 'k'.

Members

The administrator can add, delete, update and block members of internet café. The administrator can also define members' plans with (price, hours, period) variables.

Manage Members

The screenshot shows a window titled 'Members' with a table containing member information. The table has three columns: 'Member', 'Minutes', and 'Expired Da'. The data rows are as follows:

Member	Minutes	Expired Da
ODEH4	0	10/6/2004
aladeen	596	5/5/2007
fady	600	3/18/2004
ghassanrabah	600	3/18/2004
kha	600	3/18/2004
tree	1849	6/6/2004

At the bottom of the window, there are two buttons: 'Cancel' and 'New'.

Member Options

The screenshot shows a window titled "Members Options" with a table of membership options and a form for adding new ones.

Description	Minutes	Price	Period
10H-7JD-30	600	7	30
20H-10JD-60	1200	10	60
Gold	600	4	20
abdulla	1850	50	100

Below the table is a form for adding new options:

Description: 10H-7JD-30 New

Minutes: 600 Minute(s) Save

Price: 7 JD Delete

Period: 30 Day(s) Close

Play and Pay

Play and pay are for the people who come to use the internet café and will pay immediately. They are not members. The administrator can define each period of time and its equivalent price. For example, the user can define in the 1st hour the Price = 50 Cent, 2nd hour = 90 cent and etc. to define the last interval the administrator should use **9999**. The Time specified here is minutes

PAP Options

From	To	Price
6	40	25
2	4	10
4	6	20
40	9999	50
0	2	0

From: Minute(s)

To: Minute(s)

Price: Piaster(s)

Reports

ICafe has many reports that came in benefit to the internet café owners. Reports includes Income of internet café for a specific period of time for a specific employee, income based on PC, members log reports can help at what time the member has logged in and logged out. Reports that list all members. For any report you can print hardcopy of the report.
