

**Prerequisites:**

1. Ensure that Oracle 9i or 10g is installed on your system. Basic requirement can be fulfilled with 10g Express Edition Release 2 (freeware). OracleXE.exe can be downloaded freely from <http://www.oracle.com/technology/software/products/database/xe/htdocs/102xewinsoft.html>
2. There is no need for oracle client installation since InnvitE will be installed on the same system.

**Oracle User Installation**

1. Execute *OraUserSetup-Innvite1.0.exe* to install the oracle user for InnvitE.
2. After installation, run the installed program (OraUserSetup).
3. Connect to the oracle instance using a SYSDBA connection.

4. Follow following steps to install...
  - a. After entering the connection parameters, click on 'Connect'
  - b. If OracleXE is installed on a different path, you will be required to change the data files folder by clicking on 'Oracle Data Folder Path'.
  - c. After successful connection, click on 'Install DB Objects'.
  - d. After completion, click on 'Exit' to terminate.

**Server is ready to be used.**

**Client Installation**

*On the same system as OracleXE*

1. Run the file *InnvitE2.1.0setup.exe* for installation of InnvitE 2.1.0 – Professional Demo edition.
2. Post installation, run InnvitE. It will prompt for a password for the user ‘ADMINISTRATOR’.
3. Enter the password as ‘ADMINISTRATOR’.
4. Now you are ready to use InnvitE. Go through the help documents located in the Help Menu.
