

Lee MP3 Player Software

Welcome to the new Lee MP3 Player software!

System Requirements:

OS Windows XP SP2, Windows 7 & Vista.

Will run on 32-bit/ 64-bit.

To install this Player you simply unload it from the ZIP folder and place that file onto the PC.

How To Use:

Once you unload the Lee MP3 Player from the zip folder, right click on the icon and click on (Properties) allowing it to load.

Now you should click on unlock and press OK to save the settings!

There that was easy right? What this will do is keep the Lee MP3 Player from asking you if this is a trust worthy software, since you downloaded it.

How I will show you how to use the Lee MP3 Player software.

Step 1: Right (click) and open the Lee MP3 Player allowing it to load for the first time.

Step 2: Let's load the MP3 music! (Click) on File and press Change MP3 Music. This will allow you to select the MP3 music you want.

Pressing the Play button will play the selected Music in loop until you press the Stop button.

Step 3: The MP3 Player's Volume helps control the level of of sound heard.

Step 4: Loading the Background Mode, Go to Settings and you will the (Background Mode) has two tyes,

> **Background Mode (On)**

> **Background Mode (Off)**

If you press the Background Mode (On) it will allow the Lee MP3 Player to load onto the background of the PC, unnoticed well playing the MP3 Music.

Now go to File and press (Turn off Player) and it will hide in the background If you activated the Background Mode (On).

But if you left the setting at Background Mode (Off) the Player will shut down completely!

Step 5: The following command: (CTRL) (F3) will resummon the Software if it's running in Background Mode (On).

Step 6: User Key comes with 10 uses before it requires the Certificate Of Authenticity! This can be bought on the Lee Web www.leewebgt.com site.

Note: Running the Lee MP3 Player on Windows 7. When you play the MP3 music it will show up in the **Mixer** under Volume controls.
