QUESTION: 1

Mary has a Notes application that is used by employees in Europe and Japan. Each group of employees has a server located in its own geographical location. Mary needs to have versions of her application in both locations for efficient access, and the application data and design must stay synchronized in both locations.

How can Mary accomplish this?

- A. Create a copy of the database in both locations with the menu option File>Database> New Copy.
- B. Create a replica of the database in both locations with the menu option File>Replication>New Replica.
- C. Create a mirror copy of the database in both locations with the menu option File>Database>Mirror Database.
- D. Create a synchronized copy of the database in both locations with the menu option File>Synchronization>New Copy.

Answer: B

QUESTION: 2

Christopher is making a new database using the "NewVideo" Design Template that he plans to customize. He wants to make sure that his new application will not get future modifications to the "NewVideo" Design Template.

Which of the following should Christopher do to accomplish this?

- A. Create a blank database and refresh the design of the new database using the "NewVideo" Design Template.
- B. Create the new database from the "NewVideo" Design Template and deselect "Inherit future design changes" in the New Database dialog box.
- C. Create the new database from the "NewVideo" Design Template and then open the database Design properties and select "Database is a master template."
- D. Create the new database from the "NewVideo" Design Template and then open the database Design properties and select "Database file is a master template."

Answer: B

QUESTION: 3

Cam has created a new design for her Video application. Cam would like to post the design to the server and make it available so other databases can automatically inherit the design changes when the DESIGN server tasks runs.

Which of the following should Cam do to make the new design available on the development server?

- A. Copy the database to the development server, and name it "newvideo.ntf".
- B. Copy the database to the development server, and name it "newvideo.nsf".
- C. Copy the database to the server, name it "newvideo.ntf", select "Inherit design from master template", and give it a template name in the database Design properties.
- D. Copy the database to the development server, name it "newvideo.ntf", select "Database file is a master template", and give it a template name in the database Design properties.

Answer: D

QUESTION: 4

Luigi has been asked to create a view that shows the rental history of each video that's been checked out. The view should be sorted by the name of the video, and all the entries for a particular video should be grouped together.

How would he accomplish this?

- A. Create a Grouping view with the VideoTitle field as the first column, and set the Sort option to Ascending.
- B. Create a view with the VideoTitle field as the first column, and set the Sort option for the view to Ascending - Categorized.
- C. Create a view with the VideoTitle field as the first column, and set the Sort option for that column to Ascending and the Type option to Categorized.
- D. Create a view with the VideoTitle field as the first hidden column, and set the Sort option for that column to Ascending and the Type option to Categorized.

Answer: C

QUESTION: 5

Erin has created a new view in her mail file, and she doesn't want the view removed when the design is refreshed from the main design template.

What setting will keep her view from being deleted?

- A. "Prohibit design refresh or replace to modify" in the View Properties dialog box
- B. "Prohibit design refresh or replace to modify" in the Database Properties dialog box
- C. "Prohibit design refresh or replace to modify" in the Design Document Properties dialog box
- D. "Prohibit design refresh or replace to modify" in the Template Design Properties dialog box

Answer: C

QUESTION: 6

Derek has created a view in the sales.nsf database. Derek wants the Sales Value column in the view to be punctuated to display two decimal places.

Which of the following should Derek do?

- A. Use the @function @Decimal in the column formula in the view.
- B. Select decimal on the Numbers tab in the View Properties box.
- C. Select decimal on the Numbers tab in the Column Properties box.
- D. Use the @function @Decimal to format the value in the field on the form that will be displaying in the view.

Answer: C

QUESTION: 7

Darin is working on a project that requires him to collect information about users' desktop configurations. He has decided to use a button formula delivered via e-mail to capture some of this information. He wants to use an @Function that will collect the full path to the Notes.ini file on the user's computer when the button is clicked.

Which @Function should he use?

- A. @ConfigFile
- B. @IniLocation
- C. @NotesIniPath
- D. @ConfigLocation

Answer: A

QUESTION: 8

Dora has a view with a column that shows the date and time the document was created. She would like to show just the date and hide the time portion. How can she accomplish this?

- A. In the View Properties dialog box, set the view style to Date/Time and format the date to be mm/dd/yyyy.
- B. In the View Properties dialog box, set the view style to Date/Time, and deselect the Display Time option.
- C. In the Column Properties dialog box, set the column style to Date/Time and format the date to be mm/dd/yyyy.
- D. In the Column Properties dialog box, set the column style to Date/Time, and deselect the Display Time option.

Answer: D

QUESTION: 9

Hans is designing the Reviews application. The application will include two forms: Review and Response. In the view, the Response documents do not appear under the Review documents from which they were created.

Which of the following could cause this to happen?

- A. Inheritance in the Review form was disabled.
- B. Shared field values were enabled on both forms.
- C. Shared field values and field definitions were enabled.
- D. Show Response documents in a hierarchy was not enabled.

Answer: D

QUESTION: 10

Kanesha has a view that should show both main and response documents to the user, but when she displays the view, only the main documents show.

What is the cause of this problem?

- A. The response documents should be shown in a separate view.
- B. The view option "Include response documents" is not selected.
- C. The view option "Show response documents in a hierarchy" is not selected.
- D. The column option of "Show response documents in a hierarchy" is not selected.

Answer: C
