### **QUESTION: 1**

You have elected to create a marker so clients can update their reference to a database called MARKETING.NSF. You did not select a designated destination server.

Which of the following is the result of this action?

- A. The client will remove the bookmark reference for the database
- B. The client will search all servers in the domain for a replica of the database and modify the bookmark
- C. The client will search all known cluster servers only for a replica of the database and modify the bookmark
- D. The client will prompt the user to specify servers to search for a replica of the database and modify the bookmark

**Answer: A**

### **QUESTION: 2**

An organization has sent you a copy of their update site database for you to import. However, all of the features that are embedded point to their server over HTTP. Your company will not allow the Notes client to access that server.

Which of the following describes the best solution?

- A. Rebuild the application to point to an alternate update site
- B. Use the Composite Applications Editor to specify your update site for feature requirements
- C. Extract all of the features and site.xml in the provided site update database and import the features back into your update site
- D. Delete the features from the provided site update database and import your features into the provided database and point users to the remote HTTP server

**Answer: B**

### **QUESTION: 3**

IBM will now accept server crash information to be sent directly from your Lotus Notes and Domino 8 users or clients.

Which of the following scenarios is true about this?

- A. Both the server and client are automatically enabled to send crash information to IBM
- B. Both the server and the client are NOT automatically enabled to send crash information to IBM
- C. The client is enabled and the server is NOT enabled to automatically send crash information to IBM
- D. The server is enabled and the client is NOT enabled to automatically send crash information to IBM

**Answer: C**

### **QUESTION: 4**

A security settings policy document was created by Henry for his organization to lock Internet passwords after a certain number of incorrect attempts. After verifying that the policy was correctly assigned to the users, it was still not functioning.

Which of the following next steps should he take to enable this feature?

- A. Have each user log in with an incorrect password to enable the feature
- B. Restart the server that offers the HTTP service so the policy takes effect
- C. Make sure Internet password locking is enabled in the server configuration document
- D. Create a test user account and enter incorrect passwords until the lockout takes effect. This then enables it for everyone

**Answer: C**

### **QUESTION: 5**

The Marble Corporation has decided to utilize DB2 as the data storage for their Domino 8 application server.

To access the views in the DB2 database, which of the following steps must be performed if each user has different access rights to the data?

- A. Each view of the DB2 data storage must have a unique user name assigned
- B. Each database must have a specific DB2 user name created in the directory
- C. Each person document in the directory must be mapped to a unique DB2 user name
- D. A default DB2 user account must be established and mapped to each user in the directory

**Answer: C**

### **QUESTION: 6**

While deploying a new Domino server, you want to move a database to a new server for certain users, while leaving the original database in place for others.

Which of the following is the best solution to accomplish this?

- A. Visit each affected user and manually modify their bookmarks
- B. Choose the Administrator tool for database move notification to the affected users
- C. Create Redirect and specify the users that should be redirected to the new database
- D. Create or update a desktop policy with the new local replicas for the affected users

**Answer: C**

### **QUESTION: 7**

Your developers have created an Eclipse-based feature and set of plug-ins for the Lotus Notes 8 client. You, however, have already deployed the client and want the necessary users to retrieve the plug-in themselves from the client.

Which of the following next steps does the user have to perform to obtain the plug-ins?

- A. Open a plug-in storage database
- B. Click a button from an administrator sent email
- C. Utilize the update manager to obtain the plug-ins
- D. Use the integrated browser to download the plug-ins

**Answer: C**

### **QUESTION: 8**

A user has deleted a message from her inbox that has replies to it. Each of the reply documents has replies to replies.

Assuming there was three replies, which of the following occurs if the user deletes the first reply in the series?

- A. The user will not be able to render mail threads correctly and will receive a prompt
- B. All the "children" documents will be orphaned into the mailfile and no mail thread will be available
- C. The second one moves up, and the "children" of the first reply appear below the "children" of the second
- D. The "children" documents are promoted to main documents and the replies to replies of the original first reply are orphaned

**Answer: C**

### **QUESTION: 9**

The ADC prompting is disabled but the Send to IBM option is enabled.

Which of the following prompts will the user receive?

- A. The Notes client end user is prompted to specify whether to send a diagnostic report to their company administrator and to IBM
- B. A diagnostic report is not sent to the company administrator but the Notes client user is prompted to specify whether to send a diagnostic report to IBM
- C. The Notes client end user sees no messages or prompts enabled with no regarding diagnostic collection and reporting. A diagnostic prompting report is sent to the administrator
- D. A dialog box displays information to the user that a diagnostic report will be sent to their company administrator. The user is also prompted as to whether he or she would like to send a diagnostic report to IBM
