QUESTION: 1

Sara's application needs to use the same graphic in several forms. When she designed the application, she pasted the graphic into each form. However, when she views documents that were created with these forms, the browser reacts very slowly.

What should Sara do to correct this problem?

- A. Remove the graphics from the forms.
- B. Convert the graphic format to a TIFF and paste it back into the forms.
- C. Place the graphic in the database as an image resource and reference the image resource in all related forms.
- D. Compress the graphics into a single ZIP file and place the file in the database as an image resource.

Answer: C

QUESTION: 2

Marc is creating a Web application. He wants to let Web users with "No Access" view specific pages created with forms.

How can he accomplish this?

- A. Create a form with a Readers field, and give the field a computed value of "\$PublicAccess". Create a view with "\$PublicAccess" in the access list.
- B. Create a form with a \$PublicAccess field. Set the "Available to public access users" form property. Create a view with "\$PublicAccess" in the access list.
- C. Create a form with a \$PublicAccess field. Set the "Available to public access users" form property. Create a view with the "Available to public access users" property set.
- D. Create a form with a \$PublicAccess field. Set a Readers field to "Available to public access users". Create a view with the "Available to public access users" property set.

Answer: C

QUESTION: 3

Chris is creating a Web service consumer in Domino. He has a URL that he has used from a Web browser to browse the WSDL for the web service he will consume. He does not have a copy of the WSDL file on his computer. When he selected the option to import the WSDL, he was presented with a window prompting him to enter a file name.

How can Chris get the WSDL imported into his Web service consumer?

- A. Chris cannot enter a WSDL URL here. He must save the WSDL file to his local machine first.
- B. Enter the URL of the WSDL as the file name, and click the Open button. Domino will then import the WSDL.
- C. Change the http:// part of the WSDL URL to file://, and enter that as the file name. After you click the Open button, Domino will import the WSDL.

LOT-836 Demo – Pass-Guaranteed.com

D. Select the "Retrieve WSDL from Web" option. A window displays prompting for the "WSDL Web address". Enter the URL of the WSDL as the Web address, and click the Open button. Domino will then import the WSDL.

Answer: B

QUESTION: 4

Marco has been asked to create a blog for one of the executives at his company, and to include an RSS feed from the blog. Marco is considering modifying an existing database template for this purpose, but is hoping there is an easier way.

What other options does he have?

A. Create a new database from the dominoblog.ntf template. Standard blogging features, including RSS, are already included.

B. Create a new database from the discsw7.ntf template. Enable the "Launch as Blog" option on the Launch tab of the database properties. RSS is automatically enabled along with other standard blog features.

C. Create a new database from the dominoblog.ntf template. Standard blogging features are already included. To activate RSS, Marco will need a database created from the rss_generator.ntf template, then configure the feed in the RSS Feed Definitions view.

D. Create a new database from the discsw7.ntf template. Enable the "Launch as Blog" option on the Launch tab of the database properties. To activate RSS, Marco will need a database created from the rss_generator.ntf template, then configure the feed in the RSS Feed Definitions view.

Answer: A

QUESTION: 5

A richtext field on the main form of Paki's Domino application is often populated with multiple sections, and the users sometimes type multiple spaces to separate portions of text. Paki would like to ensure that all sections are expanded automatically when displayed on the Web, and he needs to ensure that displayed text includes the multiple consecutive spaces that users may have typed.

How can he do this?

A. Create a Computed for Display text field named \$\$HTMLOptions on the form. Set the field to be multi-value, and set the values to be: ForceSectionExpand=1, TextExactSpacing=1.

B. Create a Computed for Display text field named \$\$HTMLOptions on the form. Set the field to be multi-value, and set the values to be: ForceSectionExpand="0", TextExactSpacing="0".

C. From the Defaults tab of the Form properties, locate the On Web Access section. Enable the options for "Expand richtext sections" and "Preserve white space".

D. From the Advanced tab of the Form properties, locate the On Web Access section. Enable the options for "Expand all sections" and "Do not trim white space".

Answer: A

QUESTION: 6

Jean wants to provide access to all documents for the people designated as Administrators in her Web application. She needs to be able to add or remove people from this access level easily. Jean currently has an Author Names field named AllowedAuthors on her forms.

How should Jean modify her application to meet these requirements?

- A. Write an agent to add user names to the AllowedAuthors field for selected documents.
- B. Roles are not available for Web users, so Jean needs to give all Administrators a Notes client.
- C. Create a role in the database's ACL called Admin and assign the individuals to the role. Place the Admin role into the AllowedAuthors field on the form.
- D. Create an Administrator ID and add the Administrator ID name to the AllowedAuthors field. Have all Administrators use that Administrator ID to access the application.

Answer: C

QUESTION: 7

Here is an extract of data that Karen is retrieving from the PhList view of the sales.nsf application.

What new feature did Karen use to get data in this format?

```
entrydata: [ {"@columnnumber": 0,"@name": 'ContactName',text: {0: 'John Smith'}}, {"@columnnumber":  
1,"@name": 'EmailAddr',text: {0: 'jsmith@ibm.com'}}, {"@columnnumber": 2,"@name": 'Phone',text: {0: '555-  
123-1234'}} ]
```

- A. NotesDXLEExporter.FormatOption = FORMATOPTION_JSON
- B. NotesDXLEExporter.ExportOption = FORMATOPTION_ECMA
- C. &PreFormat=ECMA argument of the ReadViewEntries URL command
- D. &Outputformat=JSON argument of the ReadViewEntries URL command

Answer: D

QUESTION: 8

Maria has developed a robust Web-based Domino application using Cascading style-sheets, JavaScript, and pass-thru HTML. When her company merged with another, many new users were added who would like to access the application via their Notes client.

What should Maria do to prepare her application for their use?

- A. Reformat her text using Notes text formatting.
- B. Enable "Render DHTML" in the database properties.
- C. She must create separate forms for use with the Notes client.
