QUESTION: 1

Marshall, the Domino administrator, has enabled multi-server session authentication (MSSO), but it is not functioning properly.

Which of the following is necessary for him to complete for SSO to be enabled properly?

- A. Create a Web SSO Configuration document.
- B. Remove the HTTP task from the server notes.ini file.
- C. Remove the full DNS server name in the host name field of the Web Site or Server document.
- D. Choose Disabled in the Web Site document to prevent cookies from being used by the Domino server for authentication.

Answer: A

QUESTION: 2

You have successfully created a domcfg.nsf database for your Domino Web server. You also successfully created a custom error message when a user's Internet password has expired. However, users are not receiving the prompt when accessing the corporate portal HTML page located in the Domino\HTML directory.

Which of the following best describes the reason for this scenario?

- A. Custom error messages do not apply to non-database files.
- B. Users are not allowed to edit their password at any time via HTTP.
- C. The usage of the domcfg.nsf also requires that SSL be enabled for all custom errors to be displayed.
- D. DIOP handles the processing of custom error messages and you have not loaded this task on the server.

Answer: A

QUESTION: 3

Monique, the system administrator, wants to allow browser clients accessing a Domino-hosted Web site to run a Java applet that uses CORBA.

Which one of the following must Monique do to accomplish this?

- A. Set the database property "Web access: Enable Java Applets."
- B. Start the Domino ORB and enable the IIOP port in the Server document.
- C. Enable the SSL port in the Server document so that the IIOP port can communicate securely with the Java applet.
- D. Nothing. Domino natively enables the execution of Java applets as long as they were compiled with the lotus.notes.noi package.

Answer: B

QUESTION: 4

Your environment has directories enabled in Directory Assistance for business partners and customers. However, when users are addressing e-mail, they are receiving those users in their type-ahead lists.

Which of the following is the best solution to hide these user names?

- A. Push out a mail client policy to utilize the primary directory only for mail addressing.
- B. Specify to utilize the secondary directories for authorization only in Directory Assistance.
- C. Apply reader-only fields to all the person and group documents in the secondary directories.
- D. Move the secondary directories from the mail servers and update Directory Assistance to point to their new location.

Answer: B

QUESTION: 5

Web authentication using primary and secondary Domino and LDAP directories was established by Jose in Directory Assistance.

Which one of the following describes the order in which the directories are searched?

- A. Domino primary directory, then Domino secondary directories. This is the only option available.
- B. Domino primary directory, then either Domino or LDAP secondary directories. The administrator can specify the order of secondary searches.
- C. Domino primary directory, Domino secondary directory, then LDAP secondary directories. This is the order in which secondary searches must be made.
- D. LDAP primary directory, LDAP secondary directories, Domino primary directory, then Domino secondary directories. This is the order in which secondary searches must be made.

Answer: B

QUESTION: 6

Mitchell has built his Domino Web server using Internet Site documents. In certain sites, he has databases that allow anonymous access in the database ACLs. However, anonymous users cannot connect over the standard HTTP port. He has verified that the HTTP task has successfully loaded the Internet Site documents.

Which of the following is the best description of why the users cannot connect?

- A. Utilizing Internet Site documents do not allow for anonymous connections.
- B. The Internet Site documents have anonymous access set to 0 for TCP/IP.
- C. Anonymous connections are only allowed via SSL for Internet Site documents.

LOT-840 Demo – Pass-Guaranteed.com

D. The database ACL needs an entry of AnonymousWeb when using Internet Site documents.

Answer: B

QUESTION: 7

Monique, the system administrator, wants to allow browser clients accessing a Domino-hosted Web site to run a Java applet that uses CORBA.

Which one of the following must Monique do to accomplish this?

A. Set the database property "Web access: Enable Java Applets."

B. Start the Domino ORB and enable the IIOP port in the Server document.

C. Enable the SSL port in the Server document so that the IIOP port can communicate securely with the Java applet.

D. Nothing. Domino natively enables the execution of Java applets as long as they were compiled with the lotus.notes.noi package.

Answer: B

QUESTION: 8

Arlene, the Domino administrator, has issued the following command on the Domino Web server after making some changes:

Tell HTTP Refresh

However, the configuration changes made were not performed by the server. Which of the following provides the best explanation?

A. There is no such command for HTTP in Domino.

B. Changes were made to Web Configuration documents.

C. She is not listed in the field "Administer this server from the web."

D. She has not been assigned the WebAdministrator role in the Domino Directory.

Answer: B

QUESTION: 9

Your environment has directories enabled in Directory Assistance for business partners and customers. However, when users are addressing e-mail, they are receiving those users in their type-ahead lists.

Which of the following is the best solution to hide these user names?

A. Push out a mail client policy to utilize the primary directory only for mail addressing.

B. Specify to utilize the secondary directories for authorization only in Directory Assistance.

LOT-840 Demo – 100% Money Back Guaranteed!!!

- C. Apply reader-only fields to all the person and group documents in the secondary directories.
- D. Move the secondary directories from the mail servers and update Directory Assistance to point to their new location.

Answer: B

QUESTION: 10

Joe is attempting to implement Internet password lockout and single sign-on for his Domino servers.

Which of the following is a requirement for the lockout to function?

- A. The SSO key must be retrieved from another Domino server.
- B. The token utilized for SSO must be retrieved from a WebSphere server.
- C. Browser cache management controls must be enabled on the server providing the password lockout.
- D. The server that issues the single sign-on key must be the server on which the password lockout is enabled.

Answer: D
