QUESTION: 1

How can SQL Reporting Services Reports be integrated with Microsoft Dynamics GP?

- A. Add reports to the My Reports list in Microsoft Dynamics GP.
- B. Automatically print reports in place of original Microsoft Dynamics GP reports.
- C. Import the reports into the Reports.dic for modification in Report Writer.
- D. Print reports from the Custom Reports window in Microsoft Dynamics GP.

Answer: A

QUESTION: 2

Distributed processing is being implemented in Microsoft Dynamics GP. What are the requirements of the Process Server system? (Select TWO)

- A. Each workstation must resolve TCP/IP host names.
- B. Each process server must have a printer installed.
- C. All Microsoft Dynamics GP client computers and process servers must use the same Reports.dic.
- D. All Microsoft Dynamics GP client computers and process servers must have the same ODBC data source name.

Answer: A, D

QUESTION: 3

A posting process is sent from a client computer to a process server for completion.

How does a user on a client computer monitor the progress of the process? (Select TWO)

- A. Open the Process Monitor window on the client computer to view processes running on the local process server.
- B. Configure the report destination to place Posting Journals, the generated output of the posting process, in a shared location for review.
- C. Watch for a status message to appear on the client computer when processing is complete.
- D. Review the Posting Journals that appear automatically on the client computer when processing is complete.

Answer: A, B

QUESTION: 4

What is the purpose of the Distributed Process Manager (DPM)?

- A. The DPM serves as a client computer on which users initiate tasks.

- B. The DPM completes tasks sent to it and updates the SQL Server with results.
- C. The DPM tracks all process servers, client computers, and remote processes for Microsoft Dynamics GP to determine which process server must receive the job.
- D. The DPM displays progress of both local and remote tasks.

Answer: C

QUESTION: 5

Which of the following are differences between using SQL Server Profiler and creating a Dexsql.log?
(Select TWO)

- A. Activity for one workstation is recorded in the Dexsql.log file. SQL Server Profiler records activity for a specific user or server.
- B. ODBC messages and SQL statements are recorded in the Dexsql.log file. SQL Server Profiler only captures SQL statements.
- C. ODBC messages are recorded in the Dexsql.log file. SQL Server Profiler records ODBC messages and SQL statements.
- D. Activity for a specific user or server is recorded in the Dexsql.log file. SQL Server Profiler records activity for a specific workstation.

Answer: A, B

QUESTION: 6

The server is being configured to install Microsoft Dynamics GP. For best performance, what is the recommendation regarding physical disks?

- A. Place Microsoft Dynamics GP application code, Microsoft SQL Server application code, and Windows system files each on a separate physical disk.
- B. Place Microsoft Dynamics GP application code on one physical disk, Windows system files and page files on a different physical disk.
- C. Place Microsoft Dynamics GP application code, Windows system files, and Windows page files all on the same physical disk.
- D. Place Microsoft Dynamics GP application code, Windows system files, and Windows page files each on a separate physical disk.

Answer: D

QUESTION: 7

The Server Administrator completes the installation of Microsoft Dynamics GP. Now, the Server Administrator must install the additional Fixed Asset Management feature.

How is this accomplished? (Select TWO)

- A. Start the installation wizard on CD1; select the existing instance of Microsoft Dynamics GP; and, install the additional feature.
- B. In Control Panel, double-click Add/Remove Programs, and then select Microsoft Dynamics GP 10.0. Click Change to open the Program Maintenance window to add the new feature.
- C. Start the installation wizard on CD1; create a new instance of Microsoft Dynamics GP; and, install the additional feature.
- D. Start the New Application wizard in Component Services; select the existing instance of Microsoft Dynamics GP; and, install the additional feature.

Answer: A, B
