

MelMP version 1.00 documentation

Cost: Free

Author: Eric S. Meyer, for USALL Systems

Copyright: 2012 by Eric S. Meyer and Melanie J. Meyer. All Rights Reserved. Since this freeware may be shared without cost, it is free to use, but modifications and reverse engineering is prohibited.

### Summary:

MelMP is a free tool to set up to five alarms, of which may contain user-defined message synthesized text, along with one dynamic content delivery of religious and inspirational phrases by the Meyer family. You might expect to hear, from the “Inspirations” button or its timer at the used specified time, an advertisement, along with some Bible passage interpreted, translated in our own words, or a prayer request, or a brief story of hope and joy to help inspire and guide the listener. Guidance is of a Christian focus, with the aim being wisdom and education about the Christian Bible. This software product is Freeware, and may be given away freely, but may NOT be sold without prior written permission from the authors. The address, phone, fax of the authors is given at document conclusion.

### Introduction:

Mel(anie) M(eyer) P(oetry), or MelMP, is software to both help you wake up, time cooking and hear inspirational quotes from Melanie J. Meyer and/or her husband (the programmer). As a free Windows XP, Vista and Win 7 application, you are invited to share with others this small tool. This is freeware, because we plan to publish brief ads with the inspirational phrases.

Phrases may be inspired by the Christian Bible, or be paraphrased scripture of the Bible. Alternatively, phrases may be original sayings of either Melanie J. Meyer or Eric S. Meyer. In any case, the sayings may be updated semi-daily, meaning we might provide fresh content daily, weekly or some other frequency.

### INSTALLATION:

To install this product, simply unzip the files. Since you are reading this documentation, you probably already unzipped the files. Please place the file MelMP100.exe in an easy to find directory, or place on the desktop if desired. This small EXE files will write its datafiles to folder at <c:\mindfulmelanie>

### To UNINSTALL:

Delete the folder, <c:\mindfulmelanie> to remove datafiles. Delete the file MelMP100.exe. Finally, delete this documentation. Product does not use program registries or make any other changes to computer at installation, so the uninstallation is quite simple and easy.

### OPERATION:

#### To Use Product...

Update = store the text on the bottom of the screen to disk in the datafiles folder.

Silencer = hush the alarm until the next instance, which is 24 hours later.

Inspirations = phrases from [www.melaniemeyerpoetry.com](http://www.melaniemeyerpoetry.com) intended to inspire, edify and educate about the Christian Bible and assist the listener in being more happy and wise.

Alarm (letter from “A” to “E”): click to enable each alarm independently. Each alarm must be enabled to be audible.

Next, are two boxes for numbers to be entered. Use the left for hour, the right for minute. Format used is 12 hour A.M. Or P.M. You may select P.M. By clicking the square box to its right.

The bubble on the far right is the set button. Click it to store any changes made to the alarm ring time. Note that if you click the Alarm enable square on the far left, there is no need to click the set button, to activate an alarm to ring at the specified time.

The bottom large rectangular box is the text entry box. Here, you may enter your alarm text to be spoken by the alarm when it rings. Be sure to save it when done entering by pressing the “Update” button on the top left. Please notice that if an alarm triggers while you are entering text to set an alarm, your text entry will be permanently lost, so it is advisable to disable any alarm about to ring in the future ten minutes, to avoid any frustration.

To test an alarm, press the “Text” button. It will play the text, but not save it until you press “Update”.

To exit the program, press “Exit” once, and wait about five seconds. A thank you audio will be spoken, and then the program will exit out.

#### CONCLUSION:

Remember, this is a freeware program that you are invited to share and use without cost. However, please DO NOT attempt to reverse engineer, decompile or hack into the machine code, since this type of activity is strictly prohibited and not allowed at any time.
