

Current MULE Users Upgrade to MULE 1.5

Install Instructions

1. Uninstall the current version of MULE Server (Uninstalling the Client isn't necessary) and reboot if necessary
2. Go to <http://epicsoft.net/products/mule/try/>
3. Fill out the information form to download the new version of MULE.
4. Unzip the downloaded .zip File.
5. Go to directory you have the zip file extracted to and click on MULESERVER_SETUP.exe and click "Next".
6. Read and accept the Agreement in order to continue your installation and click "Next".
7. Select the Folder you would like to install MULE to or let the MULE install a Folder and click "Next".
8. Select the Shortcut destination or select "do not create Start Menu Folder" and click "Next".
9. Select Additional Icons and click "Next".
10. Click "Install".
11. Click "Next" and check "Launch MuleServer", click "Finish".
12. Go to "Enter Registration Key" and enter your original MULE serial number, which was sent to you in your original MULE purchase confirmation email.
*If problems arise in finding or locating this serial number, please contact support@epicsoft.net with the name, email address, and business name (if applicable) of the person who purchased MULE.
