

DataAssist NetDoc Product Family

DataAssist NetDoc AD & Microsoft Visio Bundle

You want to document your Active Directory with DataAssist NetDoc AD, but do not have a copy of Microsoft Office Visio 2003 Professional installed? Why don't you simply use our bargain priced NetDoc AD Bundle and receive a complete solution with an embedded Visio which is automatically installed together with DataAssist NetDoc AD? The embedded Visio is fully identical to the regular Visio 2003 Professional Edition except the installation is coupled with NetDoc AD.

DataAssist NetDoc AD & Microsoft Visio Bundle is available for the Single Domain as well as for the NetDoc AD Multi Domain Version.

DataAssist NetDoc AD at a glance:

- Depiction of all user group members on selecting a group
- Easy access to different domains (Multi Domain Version)
- Documenting PC must not be member of a domain anymore
- Smart and printable presentation of Custom Properties („Smart Callout“)
- Smart and customizable labeling of Shapes („Smart Captions“)
- Drag and Drop function for easy presentation of objects and command structures
- Properties of Active Directory objects are taken over to Microsoft Visio
- All Microsoft Visio export and reporting features are available
- NetDoc AD is "Verified for Microsoft® Windows® XP"

Available Versions:

- DataAssist NetDoc AD 2.0 Single Domain & Microsoft Office Visio 2003 Professional
- DataAssist NetDoc AD 2.0 Multi Domain & Microsoft Office Visio 2003 Professional

System Requirements:

- Microsoft Windows 2000, Windows 2000 Server, Windows Server 2003 and Windows XP Professional
- Microsoft .NET Framework 1.1
- Intel Pentium 200 MHz, 128 MB RAM, 2 MB free HD space (Minimum)
- Network connection to a domain with an Active Directory installed

NetDoc AD Single and Multi Domain are products of DataAssist e.K. ,
Microsoft Office Visio 2003 Professional is either registered trademark or trademark of Microsoft Corporation in the United States and/or other countries.
