DataAssist NetDoc Product Family

DataAssist NetDoc Server

Automated documentation and easy network management – rolled into one solution.

DataAssist NetDoc Server Editions combine automated network documentation with simple management features. Here, NetDoc Server is geared to the administrator's workaday tasks; so we attached great importance to a simple, quick and intuitive handling.

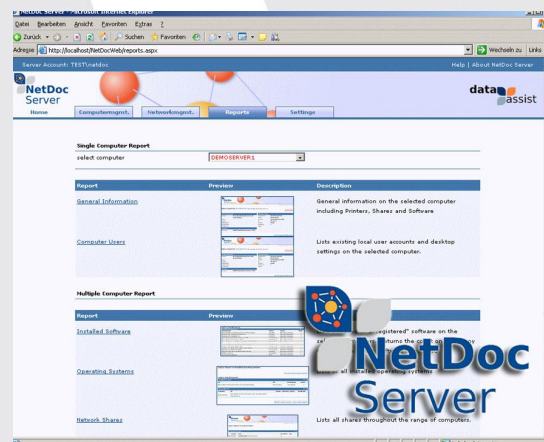

Detailed report templates help to keep track of the actual network status or current hardware working load. Of course NetDoc Server's business activities include features

NetDoc Server:

Five good reasons

1. Information received through the NetDoc Server assists administrator and other decision makers on planning network expansions, especially thanks to the high timeliness of cyclical real-time scans.
2. Gain valuable insights with license audit reports on the spot into used licenses in your network. Furthermore, reports on hardware and system configuration (Shares) are at your disposal.
3. Thanks to its structure NetDoc Server is not limited to working in a single domain, but may also be employed in your whole network with any number of domains.
4. NetDoc Servers easy management features facilitate the workaday tasks on administrating your networks; the Enterprise Edition even allows you to use those via devices as PDAs.
5. NetDoc Server is a scaleable solution without limits, it is as efficient with 100 Nodes as well with 1000 nodes and more.

as license audits. Besides the supplied report templates it is needless to say that you can generate your own and individual reports drafts. NetDocServer's integrated management features include – amongst others – booting and

shutting down PCs as well as the running and stopping of services.

In addition to the basic features of the Standard Edition, the Enterprise Edition of NetDoc Servers will allow you to document even non-permanent devices as well as accessing NetDoc Server via mobile devices as e.g. PDAs. Plus, remote desktop connections via your browser are enabled.

DataAssist NetDoc Product Family
