

NETWRIX PASSWORD MANAGER 6.5 RELEASE NOTES

This document provides a list of currently known issues that customers may experience with NetWrix Password Manager 6.5. For each issue the list includes an ID, a brief description and a workaround for the problem.

Table 1: NetWrix Password Manager 6.5 Issues

ID	Description	Workaround
1544	After upgrading from NetWrix Password Manager version 6.1, the predefinedquestions.txt file is not updated and contains questions only in the localization languages available in that version.	Prior to the upgrade, rename/relocate the predefinedquestions.txt file and manually merge it with the new predefinedquestions.txt file.
645	If only port 443 is opened in the Firewall, and SSL is enabled in IIS, the following error will be returned on end-users computers when trying to launch the enrollment wizard: “#12015 login request was denied”.	Disable your Firewall, or contact NetWrix Technical Support for instructions on which ports must be opened.
996	A service account password specified on product installation cannot be one character long.	Set a different password for your service account, or use an account with a password that is more than one character long.
