

## Optin Fuel Licence

***Congratulations!***

**You now own giveaway rights to the software**

**You are free to give away this copy of Optin Fuel**

***Please remember to distribute this file with the software***

**>> [Click here to purchase rebranding rights to the software](#) <<**

## Your Guide To...

### Configuration

*Generate an optin form in just 4 easy steps.*

Click 'Start Wizard' on the top left hand corner of the program window

## Step 1

Choose either '*Use default templates for popular autoresponder services*' or '*Paste html code from your custom autoresponder service*'.

The screenshot shows a web browser window titled "Optin Fuel". The address bar displays "UnselfishMarketer.com". The page content is titled "Step 1: Choose your favorite form setup". It features two radio button options: "Use default templates for popular autoresponder services" (which is selected) and "Paste html code from your custom autoresponder service". At the bottom of the form area, there are "Previous" and "Next" buttons. The footer of the browser window contains the text "\$50 Free Advertising Top Keyword Position" on the left and "Cover Action Scripts Back Door Pass" on the right.

Popular autoresponder services include...

- ✓ EmailAces.com
- ✓ GetResponse.com
- ✓ Aweber.com
- ✓ 1ShoppingCart.com

If you choose '*Use default templates for popular autoresponder services*', you will now need to set up your form - '*Form Setup*'.

Here, you will need to input the following details:

- Autoresponder Service
- Your Account ID / Merchant ID / User ID
- List or Campaign Name / Default Autoresponder ID / List ID
- Optional Tracking Mode
- Optional Redirect URL
- Form Title Text
- Submit Button Title

**Form Setup: Enter your account info**

Autoresponder service

☒ EmailAces.com      ☐ 1ShoppingCart.com      ☐ GetResponse.com

☐ QuickPayPro.com      ☐ Aweber.com

Account

Account ID:

List or Campaign Name:

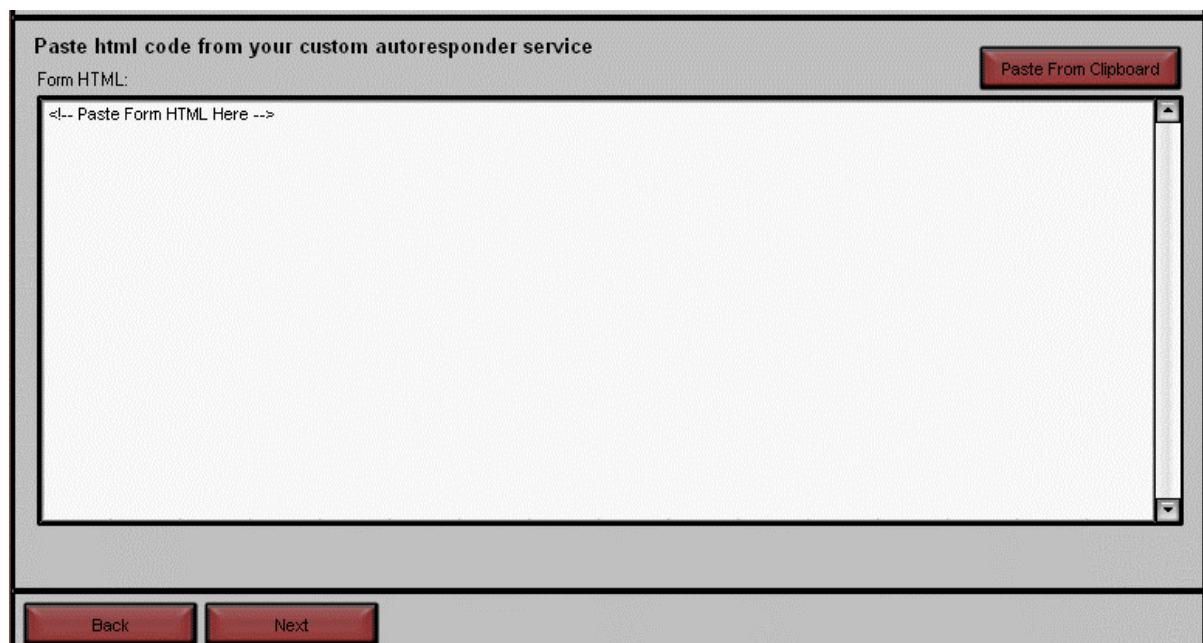

Optional Tracking Mode:

Optional Redirect URL:

Form Title Text:

Submit Button Title:

If you elect to ***'Paste html code from your custom autoresponder service'***, you will see this screen...

**Paste html code from your custom autoresponder service**

Form HTML:

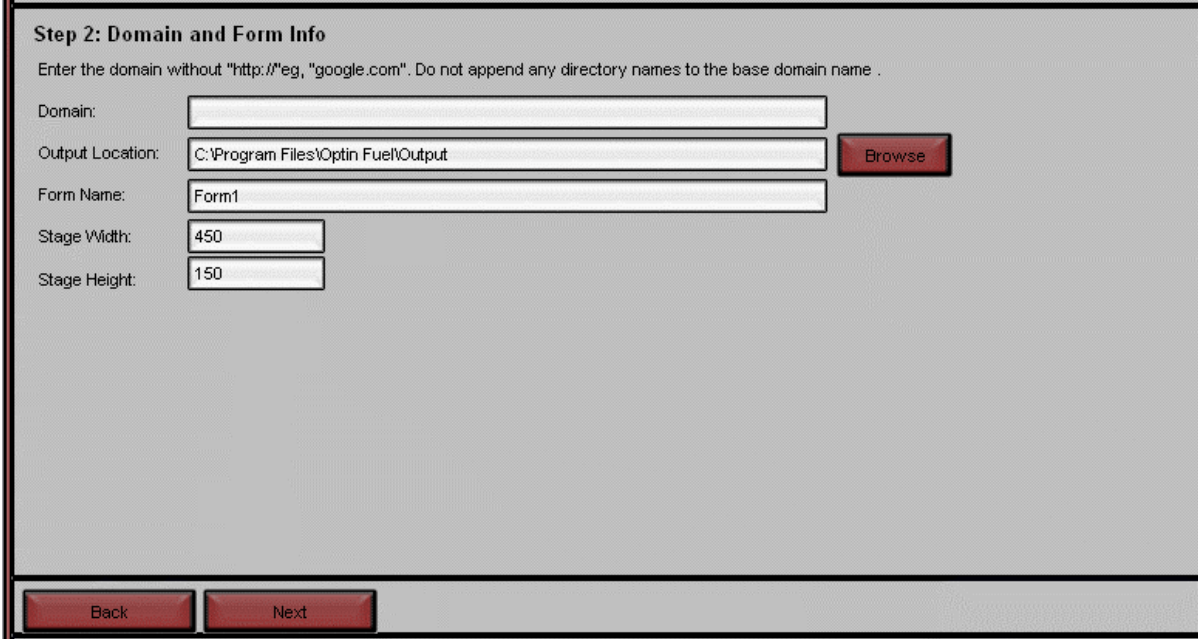

<!-- Paste Form HTML Here -->

...just paste your html in place.

## Step 2

***'Domain and File Info'***. Input your website's domain, *without* 'http://'

Now select the Output Location or choose the folder where your website's HTML files are usually stored.

**Step 2: Domain and Form Info**

Enter the domain without "http://"eg, "google.com". Do not append any directory names to the base domain name .

Domain:

Output Location:

Form Name:

Stage Width:

Stage Height:

You can edit the Form Name, Stage Width and Height to your preference.

Click ***'Next'*** to proceed.

## Step 3

*'Enter the text to be displayed in various messages and prompts'.*

Step 3: Enter text to display in various messages or prompts

Available progress bars: Barbershop 

Optional waiting message while contacting server:

Contacting server...

Missing name prompt:

Please enter your name.

Missing or invalid e-mail prompt:

Please enter your e-mail address (like 'name@domain.com').

Here, you can preview the **'Progress Bars'** and select one of four choices by clicking on **'Insert progress bar'**. The html code will be input into the text field.

Then enter in the text for the following fields:

- **Optional Waiting Message while Contacting Server:** displayed in a message area immediately after the 'Submit' button is pressed.
- **Missing Name Prompt:** displayed in an alert message when the form's name field is blank.
- **Missing or Invalid Email Prompt:** displayed in an alert message when the form's e-mail address field is left blank or it contains an invalid e-mail address.

\*Don't forget to upload the image file related to your 'Progress Bars' to your web server. You will be prompted when you click on **'Insert progress bar'**

## Step 4

*'Describe what to show after a successful post of your form'*, select and enter the details for one of the following items below, which will replace your form after it has been successfully posted to its destination.

- **Display a text message**
- **Overlay a Webpage**
- **Display an image** – You will need to specify the path for the program to find it and it will automatically copy the image you provided into the output folder and generate the HTML to display that image.
- **Error message**

Step 4: Describe what to show after a successful post of your form

☒ Display a text message:

Thank you! Your request has been processed.

☐ Overlay a web page

Page URL:

Width:  Height:

☐ Display an image

Image:

Error message:

Sorry, there was a problem contacting the web service. Please try again later.

Click **'Next'** to proceed.

You are now ready to use your generated form. You can save it in the following formats:

- Save as Webpage
- Place code in your clipboard to paste in your html editor
- Save as Wordpress plugin
- Save as Wordpress sidebar widget
- Upload your web page to your web server along with the "sub pages" that include your form's name.

*For example, if your form's name is "Form 1",  
the names of the sub-pages are as follows:*

*Form1\_frm.htm*

*Form1\_trn.htm*

*Form1\_err.htm*

Click ***Finish*** to use your form.

If you selected either 'Save as web page', 'Save as Wordpress Plugin' or 'Save as Wordpress sidebar widget', go to the Output Folder to view the exported form and its related files. Upload the necessary files which include 'optinb.php', your exported .htm file and all your image files onto your web server.

You can save your configuration by clicking on ***Save Configuration*** and load it another time so that you do not have to retype any information.

When you wish to reuse a saved configuration, just click on ***Load Configuration*** after clicking ***Start Wizard***.
