## ***HP0-045 Demo – Pass-Guaranteed.com***

### **QUESTION: 1**

You are performing a firmware upgrade using Command View TL and a Telnet session terminates it prematurely.

What is the most likely outcome?

- A. The Telnet session is automatically aborted.
- B. Telnet automatically aborts the other session, but the upgrade continues.
- C. Command View TL takes precedence and continues the firmware upgrade.
- D. The firmware upgrade aborts and the device being upgraded may need physical repair.

**Answer: D**

### **QUESTION: 2**

Where is the Interface Manager card located in a SIPP-enabled ESL E-Series Library?

- A. in the bottom slot in the library card cage
- B. in a dedicated slot at the bottom of the library
- C. in the middle slot in the cabinet controller box
- D. in a slot to the right of the cluster controller in drive cluster 1

**Answer: A**

### **QUESTION: 3**

When powering up an ESL E-Series tape library containing Ultrium tape drives with tapes loaded, the drives are no longer discovered by the Interface Manager at boot time.

What is causing the error and how can you solve it?

- A. Stopped drives which contain tapes become unusable. Replace with new drives.
- B. Drives are locked and controlled by the backup software. Reboot the backup server and then reboot the library.
- C. Drives with tapes loaded are unable to initialize. Remove drives from the library. Remove drives from the drive housings. Perform a manual tape removal and replace the drives.
- D. Drives do not join the SCSI bus until tape recovery has finished. Reboot the Interface Controller and wait three minutes to confirm device status. Verify latest firmware installed.

**Answer: D**

### **QUESTION: 4**

After hot plugging a drive in an ESL-E series library, the entire drive cluster was reset.

What must be done to bring the drives and the e2400-160 back online?

- A. Re-seat the drive.

***HP0-045 Demo – 100% Money Back Guaranteed!!!***

***HP0-045 Demo – Pass-Guaranteed.com***

- B. Power-cycle the entire drive cluster.
- C. Ensure that the configured number of drives in the OCP Setup menu equals the number of drives installed.
- D. Manually turn on each drive in the cluster from the OCP. Reset the e2400-160 that was attached to the drives in that cluster.

**Answer: D**

**QUESTION: 5**

Which information about the Interface Manager running firmware 1.7 or later is stored in the memory of each library interface controller to form an association between them for management purposes?

- A. IP address
- B. MAC Address
- C. Domain name
- D. World Wide Name

**Answer: B**

**QUESTION: 6**

How can you test the communication between the management station and any selected Interface Manager card in an ESL E-Series library from Command View TL?

- A. Run the checkIM command in the CLI.
- B. Select Support Tab > Tools > Open the Interface Manager Check dialog box.
- C. Select Actions > Connectivity Check to open the Connectivity Check dialog box.
- D. Select Support Tab > Communication Check to open the Communication Check dialog box.

**Answer: C**
