Product Activation Key Installation

If you have purchased a product activation key, you will have a file called:

`license_key_PLUGIN_NAME`

Where `PLUGIN_NAME` refers to the product(s).

Windows VST Plugins:

For Windows VST plugins, copy or move the license key file to your VST plugins folder(s), the same location(s) to which you chose to install the plugin.

Do not change the name in any way, or the key will not be found and activation will fail. This applies to all product activation keys.

OR

If the plugin GUI has a padlock in the top left corner you can click the padlock icon to open a file selector and navigate to the `license_key` file.

You will need to restart your host application to complete the activation process.

Support:

> ### Important:
>
> We cannot guarantee to replace lost activation keys or downloaded software. Please treat your software with the same care as a physical product.
>
> You are permitted to keep copies of the software and activation keys for your own personal use, however, please note:
>
> Redistribution of product activation key files will be seen as an attempt to redistribute the software, which is expressly forbidden under the terms of the license.
