Product Activation Key Installation

If you have purchased a product activation key for Mac / Windows, you will already have a file called:

`license_key_PLUGIN_NAME`

Where `PLUGIN_NAME` refers to the product(s).

Linux Plug-ins / Standalone JACK Application:

For Linux plug-ins, or the standalone JACK application, copy or move the `license_key` file to your `$HOME` folder - normally found at `/home/your-user-name`

On linux systems, you can rename the file, adding a dot to the beginning if you wish to make it hidden. Do not change the name in any other way, or the key will not be found and activation will fail.

OR

If the plugin GUI has a padlock in the top left corner you can click the padlock icon to open a file selector and navigate to the `license_key` file.

You will need to restart the (host) application to complete the activation process.

Support:

For help or advice on product licensing, and activation key installation, contact :

`support@overtonedsp.co.uk`

Important:

We cannot guarantee to replace lost activation keys or downloaded software. Please treat your software with the same care as a physical product.

You are permitted to keep copies of the software and activation keys for your own personal use, however, please note:

Redistribution of product activation key files will be seen as an attempt to redistribute the software, which is expressly forbidden under the terms of the license.
