

- Could managing your fleet of vehicles be easier?
- Do you find you spend too much time managing your vehicles?
- Are you finding it difficult to take management decisions about your vehicles because of lack of information?

Fleet Management is designed to help you record and monitor vehicles and users.

Fleet Management

Key Features

Fleet Management has many management and compliance features to assist you to manage your fleet.

Vehicle Information

All of your important vehicle information is available, searchable and updatable on your desktop.

Driver Information

All your driver information is at hand including driving licence information, incident information and licence categories.

Claims Information

Have all your claims information on hand, store the relevant documents, photos of incident and track the progress of your claim.

Lease Information

Track the lease agreements, terms and penalties you have. Know the vehicle conditions at the beginning and end of contracts.

Reporting

Pre-packaged with over nine common reports, giving clear insight into the management of your fleet. From cost analysis through to evidence of due diligence (necessary for fleets of five or more vehicles).

Technology

Our product uses the most recent industry level technology Microsoft.Net 2.0 and Microsoft SQL Server 2005 giving a scalable platform. This means you get a competitively priced solution for five to several hundred vehicles. It has been developed for a single pc and single user scenarios through to server installations with many users. The software is designed to integrate with your current systems such as Sage Accounting and Payroll and we are very positive towards developing additions and bespoke integration with your systems.

Software can be integrated with PDAs and Smart Phones

Fleet Management Software

Qnet Software has developed the most advanced, truly innovative and functionally rich software currently available. We offer a range of fully integrated systems to meet your fleet management requirements.

Fleet range of products

The administration of processes, monitoring of costs and measuring of efficiency are vital factors for any fleet operation.

Our software is designed to meet the principle requirements of:

- saving time
- Controlling and reducing operating costs
- Providing management information on demand
- Integrating with other business software and processes
- Improving levels of service
- helping to achieve best practice

Key benefits

The benefits achieved from implementing such a system are considerable:-

- Automation and integration significantly reduces operating costs through having less manual intervention driven processes.
- Increased productivity as a result of greater efficiency freeing up valuable time.
- Increased control and monitoring of all areas with automated tolerance checks and notifications being carried out by the system.
- Meaningful management information and reports provides robust management controls, cost analysis and cost saving.

Pricing

Pricing is available on request, please contact us.
We offer Qnet Fleet in the following set-ups:

Single user	Based on 1 computer
Server license	Installed on Microsoft SQL Server
1 to 10 desktops	Requires server + installation license
11 to 50 desktops	as above
50 + desktops	as above

Bespoke Integration

If you have specific requirements for integration or data collection Qnet Fleet Management can be developed to incorporate these; for example integration with accounting packages or mobile time recording (PDA) for drivers.

User Requirements

System Requirements for Vehicle Management are as follows;

.NET Framework 2.0 (included on installation CD)
Crystal Reports for .NET 2.0 (included on installation CD)
SQL Server 2000, SQL Server 2005 or SQL Server 2005 Express Edition (the latter is included on the installation CD)
Operating System: Windows Server 2003 Standard, Enterprise, or Datacenter editions with Service Pack 1 or later
Windows XP with Service Pack 2 or later
Processor: 1-gigahertz (GHz) or faster processor recommended
Memory: 352 megabytes (MB) of RAM or more; 512 megabytes (MB) or more recommended
Hard Disk: Approximately 11 MB for the Vehicle Management Application itself
Additionally; For .NET 2.0 - 280 MB (x86) or 610 MB (x64)
For SQL Server 2005 Express - 350 MB
For Crystal Reports - 75 MB Approx

Fleet overview

Qnet Software's current solution incorporates the following functionalities:

- User management
- vehicle/assets management
- Maintenance management
- Driver management
- Short term hire
- Accident management
- Fuel card management
- Lease agreement management
- Defects management
- Insurance management
- Expense management & cost allocation
