

# What's new you can get in Rcounter 2.0 version

see also [www.rcounter.noolab.ru/eng](http://www.rcounter.noolab.ru/eng)

*In the new RCounter version you expect new, professional design as well as more convenient, worked interface.*

*One of the most important interface innovations will be a set of assorted diagrams, improving statistical data clearness.*

*In the version 2.0 you will meet lots of completely new possibilities:*

- *Geographical distribution of visitors;*
- *Distribution of visits by time of day;*
- *List of site entry points, exit points, as well as popularity statistics for these points;*
- *Browsing routes of site visitors;*
- *Others...*

*The new version will allow you to carry out "watching" a concrete visitor. Having noticed a user, interesting you, and knowing his/her ip-address, you can find out all history of his/her browsing routes on your site: when and where this user was, where from he/she has come, with what regularity (in what time) the user visits your site, etc.*

*RCOUNTER can send you reports via email. It will save time of connection for users who have dial-up connection and pay depending on spent time on the Net.*

*Among "important trivialities" many useful parameters in the new version will be calculated, which were accessible earlier, but they were not represented conveniently and required a calculator. In the new version all most important parameters will be presented in a ready-to-use appearance for users.*

*Pay attention, the indicated list of improvements is not complete. It is enlarging and will enlarge continually.*

*We expect new comments, offers, and ideas from all our users at [rcounter@noolab.ru](mailto:rcounter@noolab.ru).*

*And even if your offer will be late to the version 2.0, it necessarily will be used later, in the next system versions.*

*RCOUNTER 2.0 will have both free and commercial versions. The commercial version will differ by large set of reports and analytical elements. For the commercial version users full technical support and consultation will be provided.*

**New version  
release date  
February, 2002**
