Study Tips

This product will provide you Qs and answers carefully compiled and written by our experts. Try to understand the concepts behind the Qs instead of cramming the Qs. Go through the entire document at least twice so that you make sure that you are not missing anything.

Important Note:

Please Read Carefully

This Real-Exams.net exam has been carefully written and compiled by Real-Exams.net experts. It is designed to help you learn the concepts behind the Qs rather than be a strict memorization tool. Repeated readings will increase your comprehension.

We continually add to and update our exams with new Qs, so check that you have the latest version of this exam right before you take your exam.

For security purposes, each PDF file is encrypted with a unique serial number associated with your Real-Exams.net account information. In accordance with International Copyright Law, Real-Exams.net reserves the right to take legal action against you should we find copies of this PDF file has been distributed to other parties.

Please tell us what you think of our exam. We appreciate both positive and critical comments as your feedback helps us improve future versions.

We thank you for buying our product and look forward to supplying you with all your Certification training needs.

Good studying!

QUESTION NO: 1

Which two installation modes prompt the user for information during the install process?
(Choose two.)

- A. GUI mode
- B. Silent mode
- C. Console mode
- D. Unattended mode
- E. Remote administration mode

Answer: A,C

QUESTION NO: 2

What are the three benefits of BusinessWorks Process Engines using HTTP(S) for run-time initialization? (Choose three.)

- A. HTTP(S) does not use multicast for failover.
- B. The Process Engine advertises state over HTTP(S).
- C. HTTP(S) may be used in conjunction with firewall security.
- D. HTTP(S) allows direct, point-to-point access to the administration server.
- E. HTTP(S) does not span network segments automatically and is therefore more secure.
- F. HTTP(S) does not require additional network bridging software, making it simpler to set up.

Answer: C,D,F

QUESTION NO: 3

What, if any, are the restrictions of using the TIBCO Administrator GUI via a secondary server?

- A. There are no restrictions.
- B. The only restriction is that you cannot deploy applications from a secondary server.
- C. You cannot perform any monitoring or management functions using the GUI until the secondary server is changed to READ_WRITE.
- D. You cannot perform user management, deploy applications, or perform any other activity for which READ_WRITE access is required.

Answer: D

QUESTION NO: 4

What are four options for creating a TIBCO team building environment? (Choose four.)

- A. Perforce
- B. file sharing/locking
- C. Visual SourceSafe
- D. TIBCO XML Canon
- E. TIBCO SmartMapper
- F. TIBCO Adapter cross referencing

Answer: A,B,C,D

QUESTION NO: 5

A BusinessWorks application you are developing uses JMS messaging where the messages only reside on the local campus. How should you implement conversation level security?

- A. You can define the connection used by the message producers and consumers to use SSL. You also need to provide the appropriate certificates.
- B. You can define the message producers and consumers to use PGM which encrypts all message content. You must also provide the appropriate certificates.
- C. You can define the connection used by the message producers and consumers to use a VPN. The network security administrator must configure this for you.
- D. You need to write a Java code activity to perform encryption (decryption) of the data before giving it to the message producer (or after getting from the message consumer).

Answer: A

QUESTION NO: 6

A new integration initiative in your department requires that both a test domain and a production domain be set up for your system integration staff. Due to heightened security, it is essential that all aspects of the environments be completely segregated. Which three actions must you take to achieve this? (Choose three.)

- A. install test and production TIBCO Administrator servers on machine A
- B. ensure that all Message Service Bus components are installed on a single network subnet
- C. ensure that each TIBCO BusinessWorks component belongs to only one appropriate domain
- D. ensure the TIBCO Runtime Agent network traffic for each domain is limited to a single network subnet
- E. install a test TIBCO Administrator server on machine A and a production TIBCO Administrator server on machine B
- F. ensure that the Message Service Bus naming conventions and settings are separate for test and production domains

Answer: C,E,F

QUESTION NO: 7

You want to use a host system to run deployed BusinessWorks process engines. Which two products must be installed on this host? (Choose two.)

- A. Sun Java JRE
- B. TIBCO Designer
- C. TIBCO Administrator
- D. TIBCO Runtime Agent
- E. TIBCO BusinessWorks

Answer: D,E

QUESTION NO: 8

What is a restriction on the consumption of JMS queue messages?

- A. The JMS queue message consumers cannot use selectors.
- B. There can only be one active consuming client per JMS queue.
- C. A single JMS queue message can only be consumed by one client.
- D. The limit of how many clients can consume a single JMS queue message is determined by the prefetch configuration.

Answer: C

QUESTION NO: 9

What is used to add a host machine to a TIBCO Administrative Domain?

- A. corporate LDAP
- B. TIBCO Domain Utility
- C. TIBCO Administrator GUI
- D. TIBCO Administrator Installer

Answer: B

QUESTION NO: 10

Which is a valid technique for preventing unauthorized users from triggering a process flow?

- A. lock down all process flows using transport specific security mechanisms
- B. lock down the Starter activity at the transport level via transport specific security
- C. supply a User ID and password when logging into a BusinessWorks Process Engine
- D. prevent each BusinessWorks process flow from unauthorized access by assigning a role to it

Answer: B
