

Quick Install Guide: secure2sign, Version 3

Please follow these steps to ensure your installation of secure2sign is successful.

You should receive from Avoco Secure, or your local reseller, the following files:

-  S2sXXsetup.exe (the installation executable)
-  S2slic.ini (your personal license file)
-  Readme.htm

Notes:

If you receive the files from a download site you should download the files to your desktop/network before installing.

If you receive the files in a zip you should extract all of the files to the same folder before installing.

Installation

1. Before installing ensure that both Microsoft Word and Outlook are closed
2. Ensure that the license file (s2slic.ini) is in the same folder as the secure2sign executable (s2s1Usetup.exe) (**Extract to same folder if zipped**)
3. Double click s2sXXsetup.exe to start the install process
4. Follow the on screen install prompts
5. Open Microsoft Word – you should see on the menu bar the secure2sign menu items as shown below:

Word 2000/XP/2003

Word 2007
